Department of Water Resources Electric Power Fund

Management's Discussion and Analysis

December 31, 2018

USING THIS REPORT

This discussion and analysis is designed to assist the reader in focusing on significant financial issues and activities and to identify any significant changes in financial position of the Department of Water Resources Electric Power Fund (the Fund), which is administered by the California Department of Water Resources (DWR). Readers are encouraged to consider the information presented in the *Management's Discussion and Analysis* in conjunction with the financial statements that follow. This discussion and analysis and the financial statements do not relate to DWR's other governmental and proprietary funds.

The financial statements include three required statements, which provide different views of the Fund. The three required statements are:

- The Statement of Net Position: include all assets, liabilities and deferred outflows and inflows of resources as of the period ending date.
- The Statement of Revenues, Expenses and Changes in Net Position: present all of the current year's revenues, expenses, and changes in net position.
- The Statement of Cash Flows: report cash receipts, disbursements and the net change in cash resulting from four principal types of activities: operating, capital financing, non-capital financing and investing.

These statements provide current and long-term information about the Fund and its activities. These financial statements report information using accounting methods similar (although not identical) to those used by private sector companies. In order for the financial statements to be complete, they must be accompanied by a complete set of notes. The notes to financial statements provide disclosures which are required to conform to generally accepted accounting principles. The Fund is required to follow accounting standards promulgated by the Governmental Accounting Standards Board.

PURPOSE OF FUND

The Fund was established in January 2001 through legislation to assist in mitigation of the effects of a statewide energy supply emergency.

The Fund has the authority to secure and retain title to power for resale to end use customers in the State's investor owned utilities (IOUs) service areas under power supply contracts entered into prior to January 1, 2003. The scheduling, dispatch, and certain other administrative functions for the long-term contracts were performed by the IOUs as agents for the Fund. However, the Fund retained the legal and financial responsibility for each contract for the life of the contract or until such time as there was a complete assignment of the contract to an IOU and release of the Fund. The last remaining contract terminated during the 2015 fiscal year, releasing the Fund from substantially all future power supply obligations. The Fund does not have any significant legal or financial responsibility for any power supply contracts entered into pursuant to the legislation establishing its authority.

The Fund is entitled to recover revenue requirements for authorized activities, including but not limited to debt service, the costs of power purchases, administrative expenses and reserves. Revenue requirements are determined at least annually and transmitted to the California Public Utilities Commission (CPUC) for implementation. Under the terms of the rate agreement between the CPUC and the Fund, the CPUC is required to allocate the Department's costs to customers in the IOU service areas including "departing load" (such as direct access and Community Choice Aggregation) Electric Service Providers (ESPs) such that the Fund will always have monies to meet its revenue requirements.

Management's Discussion and Analysis
December 31, 2018**

CONDENSED STATEMENT OF NET POSITION

The Fund's assets, liabilities and net position as of December 31 are summarized as follows (in millions):

	December 31, 2018	June 30, 2018
Long-term restricted cash, equivalents and investments	\$ 884	\$ 884
Recoverable costs	1,184	1,631
Restricted cash and equivalents:		
Administrative cost account	15	12
Operating account	38	38
Bond charge collection and bond charge payment accounts	1,061	608
Recoverable costs receivable	87	109
Interest receivable	8	8
Total assets	<u>3,277</u>	<u>3,290</u>
Deferral outflows of resources related to pensions	2	2
Deferral outflows of resources related to OPEB	9	9
Deferral of loss on defeasance	74	88
Total deferred outflows of resources	<u>85</u>	<u>99</u>
Total assets and deferred outflows of resources	<u>\$ 3,362</u>	<u>\$ 3,389</u>
Long-term debt, including current portion	\$ 3,321	\$ 3,348
Net pension liability	5	5
Net OPEB liability	8	8
Interfund loan payable	1	1
Other current liabilities	25	25
Total liabilities	<u>3,360</u>	<u>3,387</u>
Deferred inflows of resources related to pensions	1	1
Deferred inflows of resources related to OPEB	1	1
Total liabilities and deferred inflows of resources	<u>\$ 3,362</u>	<u>\$ 3,389</u>

Long-Term Restricted Cash, Equivalents and Investments

The Debt Service Reserve Account remained unchanged at \$884 million at December 31, 2018. The amount was determined in accordance with the Trust Indenture among the State of California, Department of Water Resources, Treasurer of the State of California, as Trustee and U.S. Bank, N.A, as Co-Trustee (Trust Indenture) and is based on the maximum annual debt service over the remaining life of the Fund's bonds.

The Debt Service Reserve Account remained unchanged at \$884 million at December 31, 2017.

Department of Water Resources Electric Power Fund

Management's Discussion and Analysis

December 31, 2018

Recoverable Costs

Recoverable costs consist of costs that are recoverable through future billings. The \$447 million decrease during the six months period ended December 31, 2018 is due to the recovery of operating costs of \$7 million and bond charges plus interest income exceeding interest and administrative expense by \$454 million. The surplus of Bond Charge Collections over debt service costs is primarily a result of the Fund's rate design which includes funding for annual debt service, including principal payments.

The \$429 million decrease during the six months period ended December 31, 2017 was due to recovery of operating expenses of \$7 million and bond charges plus interest income exceeding interest and administrative expense by \$436 million.

Restricted Cash and Equivalent

The Administrative Cost Account increased by \$3 million during the six months period ended December 31, 2018 due to the transfer of money from the Bond Charge Collection Account and the Bond Charge Payments to the Administrative Cost Account for the future payments of 2019 administrative and general costs.

The Operating Accounts remained unchanged at \$38 million at December 31, 2018.

The Bond Charge Collection and Bond Charge Payment Accounts increased by \$453 million in the period ended December 31, 2018 in anticipation of the next principal and interest payment due on May 1, 2019, and the semi-annual interest payment on fixed rate bonds due on November 1, 2019.

Recoverable Costs Receivable

Recoverable costs receivable reflects power and bond charges to customer in the IOU service areas that have not yet been collected and amounts receivable. The \$87million of recoverable costs receivable at December 31, 2018 is \$22 million lower than at June 30, 2018.

Deferred Outflows of Resources

Deferred outflows of resources related to pensions remained unchanged at \$2 million during the six months period ended December 31, 2018.

Deferred outflows of resources related to Other Post Employment Benefits (OPEB) remained unchanged at \$9 million during the six months period ended December 31, 2018.

Deferral of loss on defeasance decreased by \$14 million, during the six months period ended December 31, 2018, due to the amortization of deferred loss on defeasance.

Long-Term Debt

Long-term debt decreased to \$3,321 million, as of December 31, 2018, from \$3,348 million, as of June 30, 2018. The decrease was attributable to the net of amortization of premium.

Long-term debt decreased to \$4,097 million, as of December 31, 2017 from \$4,128 million, as of June 30, 2017. The decrease was attributable to the net of amortization of premium.

Department of Water Resources Electric Power Fund Management's Discussion and Analysis December 31, 2018

Net Pension Liability

The net pension liability remained unchanged at \$5 million during the six months ended December 31, 2018.

The net position liability was \$6 million, as of December 31, 2017.

Net OPEB Liability

In addition to pension benefits, the State of California provides postemployment health care benefits to all employees who retire on or after attaining certain age and length of service requirements. The State of California is funding postemployment benefits on a pay-as-you-go basis. The Fund's net OPEB liability remained unchanged at \$8 million as of December 31, 2018.

Interfund Loan Payable

Interfund loan payable remained unchanged at \$1 million during the six months period ended December 31, 2018.

Other Current Liabilities

Other current liabilities consist of accounts payable and accrued interest payable. Accounts payable reflects one month's accrual for employee and consultants, as payments are normally made in the latter half of the month following purchase.

Accounts payable at December 31, 2018 remained unchanged at \$2 million from June 30, 2018.

Accrued interest payable at December 31, 2018 remained unchanged at \$23 million from June 30, 2018, in anticipation of the interest payment on May 1, 2019.

Deferred Inflows of Resources

Deferred inflows of resources related to pension remained unchanged at \$1 million during the six months period ended December 31, 2018.

Deferred inflows of resources related to OPEB remained unchanged at \$1 million during the six months period ended December 31, 2018.

Management's Discussion and Analysis
December 31, 2018**

CONDENSED STATEMENT OF REVENUES, EXPENSES AND CHANGES IN NET POSITION

The Fund's activities for the period ended December 31 are summarized as follows (in millions):

	Three months ended December 31		Six months ended December 31	
	2018	2017	2018	2017
Revenues:				
Bond charges	\$ 213	\$ 217	\$ 490	\$ 492
Interest income	10	7	20	15
Total revenues	<u>223</u>	<u>224</u>	<u>510</u>	<u>507</u>
Expenses:				
Interest expense	28	35	56	71
Administrative expenses	10	3	7	7
Recovery of recoverable costs	185	186	447	429
Total expenses	<u>223</u>	<u>224</u>	<u>510</u>	<u>507</u>
Changes in net position	-	-	-	-
Net position, beginning of year	-	-	-	-
Net position, end of year	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>

Power Charges

The cost of providing energy was recoverable primarily through Power Charges to IOU customers and certain customers of ESPs. Charges are determined by applying a CPUC adopted rate for each IOU service area to the megawatt hours of power delivered by the Fund to customers in each IOU service area.

There were no power charge revenues received or excess amounts returned to IOU customers during the six months period ended December 31, 2018 and 2017.

Bond Charges

Bond Charges provide revenue for the payment of debt service on the revenue bonds and are determined by applying a CPUC adopted rate to the total megawatt hours of power delivered to all bundled customers and certain ESP customers in the IOU service areas. Bond Charges for the six months ended December 31, 2018 and 2017 were \$490 million, \$492 million, respectively, and were adequate to meet all debt service requirements and maintain Trust Indenture required account balances in the Bond Charge Collection, Bond Charge Payment, and Debt Service Reserve Accounts.

The bond charge revenue decreased \$2 million at December 31, 2018 from December 31, 2017 due to lower sales to customers.

Department of Water Resources Electric Power Fund

Management's Discussion and Analysis

December 31, 2018

Interest Income

Interest income in the six months ended December 31, 2018 increased \$5 million from the same period in 2017 due to higher interest rates earned on investments in the State of California Surplus Money Investment Fund (SMIF). The average yield earned on SMIF, for the six months ended December 31, 2018, was 1.92% compared to 1.13% for the six months ended December 31, 2017.

Interest income in the six months ended December 31, 2017 increased \$3 million from the same period in 2016.

Energy and Financial Settlements

Energy settlements, including those related to complex regulatory proceedings before the Federal Energy Regulatory Commission (FERC), arising from events in California energy markets in 2001, are recorded as a decrease in operating expenses.

Additionally, the Fund is involved in litigation with various financial institutions to resolve alleged manipulation of financial market benchmark interest rates and their impact on the Fund's bond offerings and interest rate swap agreements.

On September 13, 2018, the Electric Fund received settlement money from Deutsch Bank LIBOR AG in the amount of \$9.8 million. This settlement was already recognized as revenue at June 30, 2018. Besides this, there was no revenue received from energy settlements during the six months period ending December 31, 2018 and 2017.

Interest Expense

Interest expense in the six months ended December 31, 2018 was \$15 million lower than in the same time period in 2017. The decrease was due to lower total interest paid on outstanding debt along with higher amortization of loss on defeasance offset by higher amortization of bond premium.

Interest expense in the six months ended December 31, 2017 was \$17 million lower than in the same period in 2016. The decrease was due to lower total interest paid on outstanding debt and amortization of bond premium.

Administrative Expenses

Administrative expenses in the six months ended December 31, 2018 and 2017 remained unchanged at \$7 million.

Department of Water Resources Electric Power Fund Management's Discussion and Analysis December 31, 2018

Recovery of Recoverable Costs

The individual components of the recovery of recoverable costs are as follows (in millions):

	Three months ended December 31		Six months ended December 31	
	2018	2017	2018	2017
Operations	\$ (10)	\$ (3)	\$ (7)	\$ (7)
Debt service and related costs	(195)	(189)	454	436
	<u>\$ (205)</u>	<u>\$ (192)</u>	<u>\$ 447</u>	<u>\$ 429</u>

Operations

The negative \$7 million operations recovery, in the six months ended December 31, 2018, is primarily due to pro-rata charges and payments to employees and consultants.

The negative \$7 million operations recovery, in the six months period ended December 31, 2017, is primarily due to the absence of material revenues received from energy settlements and no return of excess amounts to ratepayers in the IOU service areas.

Debt Service and Related Costs

The \$454 million recovery of debt service and related costs were \$18 million higher for the six months ending December 31, 2018, compared to the same period in 2017. The recoveries in 2018 was higher due to lower interest expense and higher Interest income, even with lower bond charges collected from IOU customers.

LIQUIDITY

Various provisions of the Trust Indenture provide resources for the Fund to meet its cash requirements. In addition to its determination of revenue requirements, prepared annually or more frequently if necessary, to meet both operating and bond related expenditures, the Fund has a Debt Service Reserve Fund in order to meet expenditures if bond charge revenue is impaired. The minimum balance in the Debt Service Reserve Fund is based on the Maximum Annual Debt Service.

With the termination of the last remaining power contract, reserves for operating the Fund's power purchase program are no longer necessary. As of January 2016, the remaining Operating Reserve Account funds were transferred to the Operating Account for return to customers in the IOU service areas.

Under the Section 80130 of the California Water Code, the Fund has a total debt issuance limit of \$13.4 billion, which does not include refunding debt issued: (i) to obtain a lower interest rate, (ii) to convert variable rate debt to fixed rate debt or (iii) to replace debt for which the credit rating of the insurer or credit facility provider has been or will be downgraded or withdrawn.

On August 30, 2016, Moody's Investor Service raised the underlying rating on Power Supply Revenue Bonds from "Aa2" to "Aa1" with a stable rating outlook. On March 24, 2015, Standard & Poor's Ratings Services raised the underlying rating on the Power Supply Revenue Bonds from "AA-" to "AA" with a stable rating outlook. Also, on March 24, 2015, Fitch Ratings raised the underlying rating on the Power Supply Revenue Bonds from "AA" to "AA+" with a stable rating outlook. More information can be obtained from each credit rating agency's website: www.moody.com, www.fitchratings.com, and www.standardandpoors.com.

Department of Water Resources Electric Power Fund
Notes to Financial Statements
December 31, 2018
(in millions)

1. Reporting Entity

In January 2001, the Governor of California issued an emergency proclamation directing the Department of Water Resources (DWR) to enter into contracts and arrangements for the purchase and sale of electric power to assist in mitigating the effect of a statewide energy supply emergency.

The Department of Water Resources Electric Power Fund (the Fund), administered by DWR, was established in January 2001 through legislation adding Division 27 to the California Water Code (the Code).

The Fund purchases power from wholesale suppliers under contracts entered into prior to January 1, 2003 for resale to customers in the service areas of the State's investor owned utilities (IOUs): Pacific Gas & Electric Company (PG&E), Southern California Edison Company (SCE), and San Diego Gas and Electric Company (SDG&E). The Code prohibits the Fund from entering into new power purchase agreements after December 31, 2002 but allowed the Fund to enter into gas purchase contracts to provide fuel for power generation.

The Fund's power is delivered to customers through the transmission and distribution systems of the IOUs and payments from customers are collected for the Fund by the IOUs pursuant to servicing arrangements approved and/or ordered by the California Public Utilities Commission (CPUC).

Under the Code, the Fund has the authority to establish a revenue requirement to recover all Fund costs, including debt service. At least annually, Fund management establishes a determination of the revenue requirement, which then is submitted to the CPUC. Under the terms of a rate agreement between the Fund and the CPUC, the CPUC implements the Fund's determination of its revenue requirements by establishing end use customer rates that meet the Fund's revenue needs to assure the payment of debt service, power purchases, administrative expenses and maintenance of operating and debt service reserves.

2. Summary of Significant Accounting Policies

Basis of Presentation

The Fund is accounted for as an enterprise fund and is financed and operated in a manner similar to that of a private business enterprise. The Fund uses the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles, which considers the Fund a Regulated Operation under GASB Statement No. 62. The Fund is accounted for with a set of self-balancing accounts that comprise of assets, deferred outflows of resources, liabilities, deferred inflows of resources, net position, revenues and expenses.

The financial statements of the Fund are intended to present the financial position, and the changes in financial position and cash flow, of only that portion of the business-type activities and major funds of the State of California that is attributable to the transactions of the Fund. They do not purport to, and do not, present the financial position of the State of California and the changes in its financial position and its cash flows, in conformity with accounting principles generally accepted in the United States of America.

Comparative data for prior years have been presented for certain sections of the accompanying financial statements in order to provide an understanding of changes in the Fund's financial position and operations.

Department of Water Resources Electric Power Fund

Notes to Financial Statements

December 31, 2018

(in millions)

Current Year GASB Implementation

For the year ended June 30, 2018, the Fund implemented GASB Statement No. 75 (GASB 75), *Accounting and Financial Reporting for Postemployment Benefits other than Pensions*. This statement replaces the requirement of Statements No.45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, as amended, and No, 57, *OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans*.

The primary objective of this statements is to improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions (other postemployment benefits or OPEB).

Restricted Cash, Equivalents and Investments

Under the terms of the Trust Indenture among the State of California, Department of Water Resources, Treasurer of the State of California, as Trustee and U.S. Bank, N.A, as Co-Trustee (Trust Indenture) separate restricted cash and investment accounts were established. The accounts and their purpose follow:

Administrative Account:

- Administrative Cost Account: Salaries, consultant fees and other administrative expenses were previously funded by Power Charges transferred from Operating Account. Since there are no longer power charge remittances, funds are now transferred from the Bond Charge Payment Account as of January 1, 2016.

Power Charge Account:

- Operating Account: Power Charges (see Revenues and Recoverable Costs) and miscellaneous revenue are deposited into the operating account. Monies are available for payment of residual contract obligations and return of excess amounts to ratepayers.

Bond Charge Accounts:

- Bond Charge Collection Account: Bond Charges (see Revenues and Recoverable Costs) are deposited into the Bond Charge Collection Account. Monthly, funds needed for debt service payments and administrative costs are transferred to the Bond Charge Payment Account.
- Bond Charge Payment Account: Monies in the Bond Charge Payment Account are used to pay debt service and related fees for the revenue bonds and administrative costs. After receipt of the monthly transfer from the Bond Charge Collection Account, the balance in the Bond Charge Payment Account must at least equal debt service and fees estimated to accrue or be payable for the next succeeding three months.
- Debt Service Reserve Account: The Debt Service Reserve Account was initially funded with proceeds of the Series 2002 Bonds. The Debt Service Reserve Account is to be funded at all times with the amount of maximum aggregate annual debt service on all outstanding debt. If the Debt Service Reserve Account needed to be replenished, the funds would be transferred from the Bond Charge Collection Account.

Restricted cash and equivalents, for purpose of the Statement of Cash Flows, include cash on hand and deposits in the Surplus Money Investment Fund (SMIF). The Debt Service Reserve Account (net of investments) is classified as long-term restricted cash due to requirements under the Trust Indenture to hold amounts in excess of anticipated current payments for bond related expenses. Amounts required to be held in reserve are determined annually by the Fund's revenue requirement.

Department of Water Resources Electric Power Fund

Notes to Financial Statements

December 31, 2018

(in millions)

SMIF has an equity interest in the State of California Pooled Money Investment Account (PMIA). Generally, the investments in the PMIA are available for withdrawal on demand. The PMIA cash and investments are recorded at amortized cost, which approximates fair value. The PMIA funds are on deposit with the State's Centralized Treasury System and are managed in compliance with the California Government Code, described in Note 3.

Long-term investments are held solely in the Debt Service Reserve Account by the bond co-trustee and consist of guaranteed investment contracts (GICs) and a U.S. government backed agency security in accordance with a forward purchase agreement (FPA). The GICs are carried at cost and the U.S. government backed agency security (FPA) is carried at fair value.

Net Position

The Fund does not record the difference between assets and liabilities as net position. The difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources on the Statement of Net Position is presented as recoverable costs such that there is no net position. The Fund anticipates that amounts in the recoverable costs will be recovered in subsequent years prior to program expiration.

Revenues and Recoverable Costs

The Fund is required, at least annually, to establish a determination of the revenue requirement to be transmitted to the CPUC, which then sets end use customer remittance rates. The Fund's financial statements are prepared in accordance with GASB Statement No. 62, which requires that the effects of the revenue requirement process be recorded in the financial statements. Accordingly, all expenses and credits, normally reflected in the change in net position as incurred, are recognized as recoverable costs in the Statement of Net Position and are recovered from IOU customers. Costs that are recoverable through future billings are recorded as long-term assets.

Customer charges are separated into two primary components, power charges and bond charges. Power charge revenues recover the cost of power purchases, other expenses and operating reserves and are recognized when energy provided by the Fund is delivered to IOU customers. Bond charge revenues recover debt service, debt service reserves and other bond related costs and are recognized when energy provided by the IOU, or an ESP, is delivered to customers in the IOU service areas. Costs are recovered over the life of the bonds as determined by the Fund's revenue requirement process.

Pensions

For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Fund's portion of the California Public Employees' Retirement System (CalPERS) Miscellaneous Plan (Plan) and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

OPEB

The State of California provides medical and prescription drug benefits to retired state employee and dependents through CalPERS under the Public Employee's Medical and Hospital Care Act, and dental benefits under the State Employees' Dental Care Act. The State, and certain bargaining units and judicial employees (valuation groups) have agreed to refund retiree healthcare benefits. Assets are held in separate accounts by valuation group within the California Employers' Retiree Benefit Trust (CERBT), an agent multiple-employer defined benefit other postemployment benefits plan administered by CalPERS.

3. Restricted Cash and Investments

As of December 31, 2018, the Fund had the following cash, equivalents and investments (in millions):

<u>Investment</u>	<u>Maturity</u>	<u>December 31, 2018</u>
State of California Pooled Money		
Investment Account - Surplus Money		
Investment Fund	6.3 months avg.	\$ 1,693
Cash		3
Total cash and equivalents		<u>1,696</u>
Guaranteed investment contracts	May 1, 2022	200
Forward purchase agreement	May 1, 2019	102
		<u>\$ 1,998</u>
Reconciliation to Statement of Net Position:		
Debt service reserve account		\$ 884
Administrative cost account		15
Operating account		38
Bond charge collection and		
Bond charge payment accounts		1,061
		<u>\$ 1,998</u>

Custodial Credit Risk: Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, a government will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. The State of California has a deposit policy for custodial credit risk that requires deposits held by financial institutions to be insured by federal depository insurance or secured by collateral held in the State's name. At December 31, 2018 and 2017, one of the guaranteed investment contracts in the amount of \$100 million was uninsured and uncollateralized.

Interest Rate Risk: Interest rate risk is the risk that the value of fixed income securities will decline because of changing interest rates. The prices of fixed income securities with a longer time to maturity, measured by effective maturity, tend to be more sensitive to changes in interest rates and, therefore, more volatile than those with shorter maturities. The State Treasurers Investment Policy, Pooled Money Investment Account, provides for spreading investments over various maturities to minimize the risk of portfolio depreciation due to a rise in interest rates. The State Treasurers Investment Policy limits investments to the following maximum maturities: U.S. Treasury securities, 5 years; federal agency securities, 5 years; bankers acceptances – domestic and foreign, 180 days; certificates of deposits, 5 years; commercial paper, 180 days; corporate bonds and notes, 5 years; repurchase agreements and reverse repurchase agreements, 1 year.

Credit Risk: Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The PMIA funds are on deposit with the State's Centralized Treasury System and are managed in compliance with the California Government Code, according to a statement of investment

Department of Water Resources Electric Power Fund
Notes to Financial Statements
December 31, 2018
(in millions)

policy which sets forth permitted investment vehicles, liquidity parameters and maximum maturity of investments. These investments consist of U.S. government securities, securities of federally-sponsored agencies, U.S. corporate bonds, interest bearing time deposits in California banks, prime-rated commercial paper, bankers' acceptances, negotiable certificates of deposit, repurchase and reverse repurchase agreements. The PMIA policy limits the use of reverse repurchase agreements to limits of no more than 10% of the PMIA and commercial paper to limits not to exceed 30% of the PMIA. The PMIA does not invest in leveraged products or inverse floating rate securities. The PMIA is not rated.

Concentration of Credit Risk: The SMIF concentration of credit risk is limited by spreading the investment mix over different investment types and issuers to minimize the impact any one industry, investment class, or institution can have on the SMIF portfolio. At December 31, 2018 and 2017, the Fund's investments in the FPA and two GICs individually exceed 5.0% of total investments. The ratings of the investments and their relative percentages of total investments is shown in the following table:

	<u>Amount</u>	<u>S&P Credit Rating</u>	<u>Percent of Total Investments 2018</u>
FPA Provider			
Bank of America Merrill Lynch Discounted Notes	\$ 102	Not Rated	5.13%
GIC Providers			
MassMutual	\$ 100	Not Rated	5.01%
Royal Bank of Canada	100	Not Rated	5.01%
	<u>\$ 200</u>		

Interest on deposits in the SMIF varies with the rate of return of the underlying portfolio and approximated 1.92% and 1.13% at December 31, 2018 and 2017, respectively. For the six months ended December 31, 2018 and 2017, interest earned on the deposit in the SMIF was \$14 million and \$8 million, respectively.

Interest on the GICs is paid semi-annually at interest rates ranging from 5.3% to 5.5%. Interest earned on the GICs was \$5 million for the six months ended December 31, 2018 and 2017.

The FPA allows the Fund to continuously reinvest funds in U.S. government or U.S. government agency securities through May 2022 to earn a minimum rate of return of 4.7%, as specified in the Reserve Fund FPA, dated May 1, 2004. The reinvested securities are to mature every six months. Interest earned on the FPA was \$2 million for the six months ended December 31, 2018 and 2017.

Fair Market Value measurement: The Fund categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; level 2 inputs are significant other observable inputs; level 3 are significant unobservable inputs. Guaranteed Investment Contracts are reported as cost.

The Fund has the following recurring fair value measurements as of December 31, 2018:

- The FPA of \$102 million is valued using market approach (Level 2)

4. Long-Term Debt

The following activity occurred in the long-term debt accounts during the six months ended December 31, 2018 (in millions):

	Revenue Bonds	Unamortized Premium	Total
Balance, June 30, 2018	\$ 3,212	\$ 136	\$ 3,348
Payments	-	-	-
Amortization		27	27
Balance, Dec 31, 2018	3,212	109	3,321
Less current portion	-	48	48
	<u>\$ 3,212</u>	<u>\$ 61</u>	<u>\$ 3,273</u>

Long-term debt consists of the following at December 31, 2018, respectively (in millions):

Series	Rates	Fiscal Year of Final maturity	Fiscal Year of First Call Date	Amount Outstanding 2018	Current Portion
L	Fixed (3.5-5.00%)	2022	2020	\$ 1,062	\$ 561
M	Fixed (3.00-5.00%)	2020	Non-callable	157	153
N	Fixed (3.00-5.00%)	2021	Non-callable	669	35
O	Fixed (2.00-5.00%)	2022	Non-callable	766	-
P	Fixed (1.71-2.00%)	2022	Non-callable	558	5
				3,212	754
Plus unamortized bond premium				109	48
				<u>\$ 3,321</u>	<u>\$ 802</u>

Bond Debt Refunding Transaction

On September 28, 2016, the Fund issued \$567 million of Series P refunding revenue bonds. Proceeds of \$566 million from the refunding bonds, less \$2 million for issuance expenses and \$38 million released from the Debt Service Reserve and Bond Charge Payment accounts totaling \$603 million, were used to purchase securities that were deposited in an irrevocable trust with an escrow agent that will provide resources sufficient to pay the future debt service on the advance refunded \$555 million of outstanding Series F and Series H revenue bonds. As a result, the refunded bonds are considered defeased and

Department of Water Resources Electric Power Fund
Notes to Financial Statements
December 31, 2018
(in millions)

have been removed from the Statement of Net Position. This loss on the bond refunding is reported as deferred outflows of resources on the Statement of Net Position and will be amortized over the life of the refunding bonds. As of December 31, 2018, the outstanding balance of refunded bonds is \$294 million.

Key Terms

Principal and interest payments are payable from bond charges. The Fund is subject to certain bond covenants, including establishing funding and expenditure requirements for several restricted cash and investment accounts. The bonds are limited special obligations of the Fund. Neither the principal nor any interest thereon constitutes a debt of the State of California.

The Series L is callable at a redemption rate of 100 percent in 2020. The Series M, N, O and P are non-callable.

Maturities

Future payment requirements on the revenue bonds are as follows at December 31, 2018 (in millions):

<u>Fiscal Year</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2019	\$ 754	\$ 70	\$ 824
2020	790	104	894
2021	803	67	870
2022	865	34	899
	<u>\$ 3,212</u>	<u>\$ 275</u>	<u>\$ 3,487</u>

5. Commitments and Contingencies

Litigation and Regulatory Proceedings

Certain pending legal and administrative proceedings involving the Fund or affecting the Fund's power supply program are summarized below.

California Refund Proceedings: During 2001 and 2002, the Fund purchased power in bilateral transactions (both short-term and long-term), sold power to the California Independent System Operator (CAISO), paid for power purchased by the CAISO and purchased power from the CAISO for sale to customers of the IOUs. In July 2001, the Federal Energy Regulatory Commission (FERC) initiated an administrative proceeding to calculate refunds for inflated prices in the CAISO and California Power Exchange (PX) markets during 2000 and 2001. FERC ruled that the Fund would not be entitled in that proceeding to approximately \$3,500 million in refunds associated with the Fund's approximately \$5,000 million of short-term purchases because the Fund made those purchases bilaterally, not in the PX or CAISO markets. The Ninth Circuit Court of Appeals affirmed FERC but left open the possibility of refunds on the Fund's bilateral purchases in other FERC proceedings. In contrast, FERC ruled that the Fund is entitled to refunds on purchases made by the CAISO where the Fund actually paid the bill.

Of the Fund's \$5,000 million in short-term bilateral purchases, \$2,900 million was imbalance energy which the Fund sold to the CAISO at the Fund's cost in order to meet the CAISO's emergency needs during 2001. The Fund is treated in the FERC refund proceeding as a seller of that energy to CAISO, and in May 2004, FERC issued an order requiring the Fund to pay refunds on the sales to the CAISO. In September 2005, the Ninth Circuit Court of Appeals held that FERC does not have authority to order

Department of Water Resources Electric Power Fund

Notes to Financial Statements

December 31, 2018

(in millions)

refunds from governmental entities such as the Fund. In November 2008, FERC found that although FERC cannot order a governmental entity, such as the Fund, to pay refunds, it can enforce the terms of the CAISO's tariff, which requires that all purchases and sales in a given hourly settlement period are netted. But for the more than 60 refund settlements the Fund has entered into to date, this order would have resulted in a substantial reduction to the refunds payable to the Fund. Through the Fund's settlements, however, the Fund has been able to resolve all but one of its short-term refund claims, and has been able to reduce to a de minimus amount, the amount, the amount by which its refunds have been reduced on account of the Fund's sales to the CAISO. Proceedings before FERC to wind-up the short-term refund case for purchases made in the electricity markets operated by the CAISO and PX are underway. Additional amounts, including interest, may be payable to the Fund when this wind-up is completed. The Fund's lone remaining short-term refund claim, a bilateral claim, remains subject to litigation.

Direct Access Proceeding: On February 28, 2008, the CPUC approved a decision concluding that the suspension of direct access cannot be lifted at the present time because the Fund is still supplying power under the Act. However, the decision continued the proceeding to consider possible approaches to expediting the Fund's exit from its role of supplying power under the Act. On November 21, 2008, the CPUC adopted a plan with the goal of the early exit of the Fund from its role as supplier of power to retail electric customers. Under this plan, the Fund's power purchase contracts would be replaced by agreement between the IOUs and the Fund's power supplier counterparties that are not detrimental to ratepayers, through novation and/or negotiation.

Senate Bill 695: On October 11, 2009, Senate Bill (SB) 695 was signed into law as an urgency statute. SB 695 allows individual retail nonresidential end-use customers to acquire electric service from other providers in each IOU service area, up to a maximum allowable limit. Except for this express authorization for increased direct access transactions under SB 695, the previously enacted suspension of direct access remains in effect. On March 15, 2010, the CPUC issued Decision 10-03-022 which authorizes increases in the maximum direct access load for each IOU service area, as specified in SB 695. The maximum load of allowable direct access volume is established for each IOU as the maximum total kilowatt hour (kWh) supplied by all other providers to distribution customers of the IOU during any sequential 12-month period between April 1, 1998 and the effective date of the section of the Public Utilities code modified by SB 695, October 11, 2009.

Decision 10-03-033 phases in the additional load allowance over a four-year period beginning on April 11, 2010. The annual phase in of the limits combined with the concurrent expiration of several long-term contracts has not resulted in impacts to the Power Charges. Regardless of the level of direct access participation within the IOU service area, direct access customers will still be assessed Bond Charges and the Fund's revenue requirement will be recovered in the same manner as has been successfully implemented over the duration of the Power Supply Program.

Other Contingencies

The Fund is self-insured for most risks, including general liability and workers' compensation. Management believes the Fund's exposure to loss is immaterial and that any costs associated with such potential losses are recoverable from customers as part of the Fund's revenue requirement.

Commitments

The last remaining power purchase contract and natural gas transmission capacity contract were terminated during fiscal year 2015. The Fund is no longer exposed to future obligations related to power or natural gas purchases under any of the contracts which had been scheduled to require payments through 2018.

Department of Water Resources Electric Power Fund

(in millions)

6. Energy and Financial Settlements

The Fund and other parties have entered into settlement agreements with various energy suppliers which resolve potential and alleged causes of action against suppliers for their part in alleged manipulation of natural gas and electricity commodity and transportation markets during the 2000 - 2001 California energy crisis, and also received settlements from other FERC actions.

Additionally, the Fund has begun to be involved in litigation with various financial institutions to resolve alleged manipulation of financial market benchmark interest rates and their impact on the Fund's bond offerings and interest rate swap agreements.

On September 13, 2018, the Electric Fund received settlement money from Deutsch Bank LIBOR AG in the amount of \$9.8 million. This settlement was already recognized as revenue at June 30, 2018. Besides this, there was no revenue received from energy settlements during the six months period ending December 31, 2018 and 2017.
