Interagency Ecological Program

Agency Directors

Set the vision and direction, then approve steps to achieve it. The Chair of the Directors will lead IEP Director's activities.

Regulatory & Operations Advisory Group

Coordinators Team

Provide leadership and coordination of IEP activities through the IEP Strategic Plan, IEP Science Agenda, IEP Work Plan, and communication. The Chair will lead activities, strategic planning efforts, and act as the primary spokesperson.

Lead Scientist

Coordinators Team Chair

Program Manager

Stakeholder Group

Opportunities for stakeholders to engage with the IEP on a regular basis.

Science Management Team

Chair: IEP Lead Scientist

Facilitate, guide, and communicate science between IEP studies, teams (Project Work Teams, Focused Technical Teams, and Synthesis) and the greater science community. Collectively seek to understand science and advise the Coordinators and IEP teams on the progress of science to meet management needs, identify gaps, priorities, and efficiencies. Recommend future studies, reviews, and other approaches to resolving specific science needs.

Program Support Team

Chair: IEP Program Manager

Provides overall program administrative and business support necessary to implement IEP activities to ensure efficiency, effectiveness and consistency. They provide support to the overall program including the Directors, Science Management Team, Coordinators Team, and IEP Lead Scientist.

Central Valley Fish Facilities Review Team

- **Anadromous Fish Screen Program Technical Team**
- **Tracy Technical Advisory Team**

Project Work Teams (PWTs)

Serve as scientific experts and advisors for specific science topic areas to promote collaboration and cooperation between interested parties, help facilitate communication among other experts within a given topic area to more efficiently provide information to the broader science community, and inform IEP including the Science Management Team and IEP Lead Scientist.

Central Valley Salmonid	Resident Fishes	Winter Run Salmon
Sturgeon	Yolo Bypass	Juvenile Monitoring
Estuarine Ecology	Tidal Wetland Monitoring	Hatchery
Biotelemetry	Salmon Genetics	Escapement Monitoring
Pelagic Organism Decline Contaminants	Upper Sacramento River Salmon	Steelhead

Technical Teams

- **Science Advisory Group**
- **Management, Analysis, and Synthesis Team (MAST)**
- **Fall Low Salinity Habitat Investigation (FLaSH)**
- **Other Focused Technical Teams**

Program Support Teams

- **Project Tracking and Coordination**
- **Documentation and Reporting**
- **Data Management Group**
- **Take Management Team**
