Dear Property Owner/Resident,

The California Department of Water Resources (DWR) will be installing temporary emergency power generation at a property within 1,000 feet of your property/residence. The location of the DWR project is 2001 West Turner Road, Lodi, California 95242.

The purpose of the project is to achieve the objectives of California Assembly Bill 205 (AB205), which created a State-led Strategic Reliability Reserve (SRR) to address electric grid reliability. Because of DWR's expertise as a water and power utility, DWR has been tasked to work with the California Energy Commission (CEC) to develop projects that would expand power generation and energy storage facilities to respond to energy shortages due to extreme events (per California Public Resources Code 25790.5), such as heatwaves or wildfires. This effort includes the installation of emergency power generator units at existing facilities so that they can feed directly into the electric grid. The intent of this project is to increase grid reliability during emergency situations and avoid potential black-out conditions. Two sites associated with this effort, in Roseville and Yuba City, have already been deployed, which aided in meeting power demands throughout the historic 2022 Labor Day heatwave event. Additional sites are planned throughout the State to ensure California's power demands continue to be met during future events causing significant draw on the State energy grid.

The project would include the installation of natural gas generators and associated infrastructure. The generators would be connected to the adjacent substation and would feed directly into the grid in response to an extreme event such as an excessive heatwave. Construction would begin spring of 2023 and would have a duration of four to six months. Temporary detours may be required on adjacent roadways to allow for certain construction activities, such as equipment delivery or installation. Appropriate roadway signage and/or traffic control flaggers would be deployed during any activity that would interfere with the normal flow of traffic. The generators would be operational by October 2023 and would be available for extreme event use for a minimum 5 years.

For information regarding environmental review and additional updates please see the State Power Augmentation Project website: https://water.ca.gov/What-We-Do/Power?utm_medium=email&utm_source=govdelivery. If you have any questions, please contact Shelly Amrhein at (916) 661-1970 or by email at Rochelle.Amrhein@water.ca.gov.

Sincerely,

Jerry Snow
