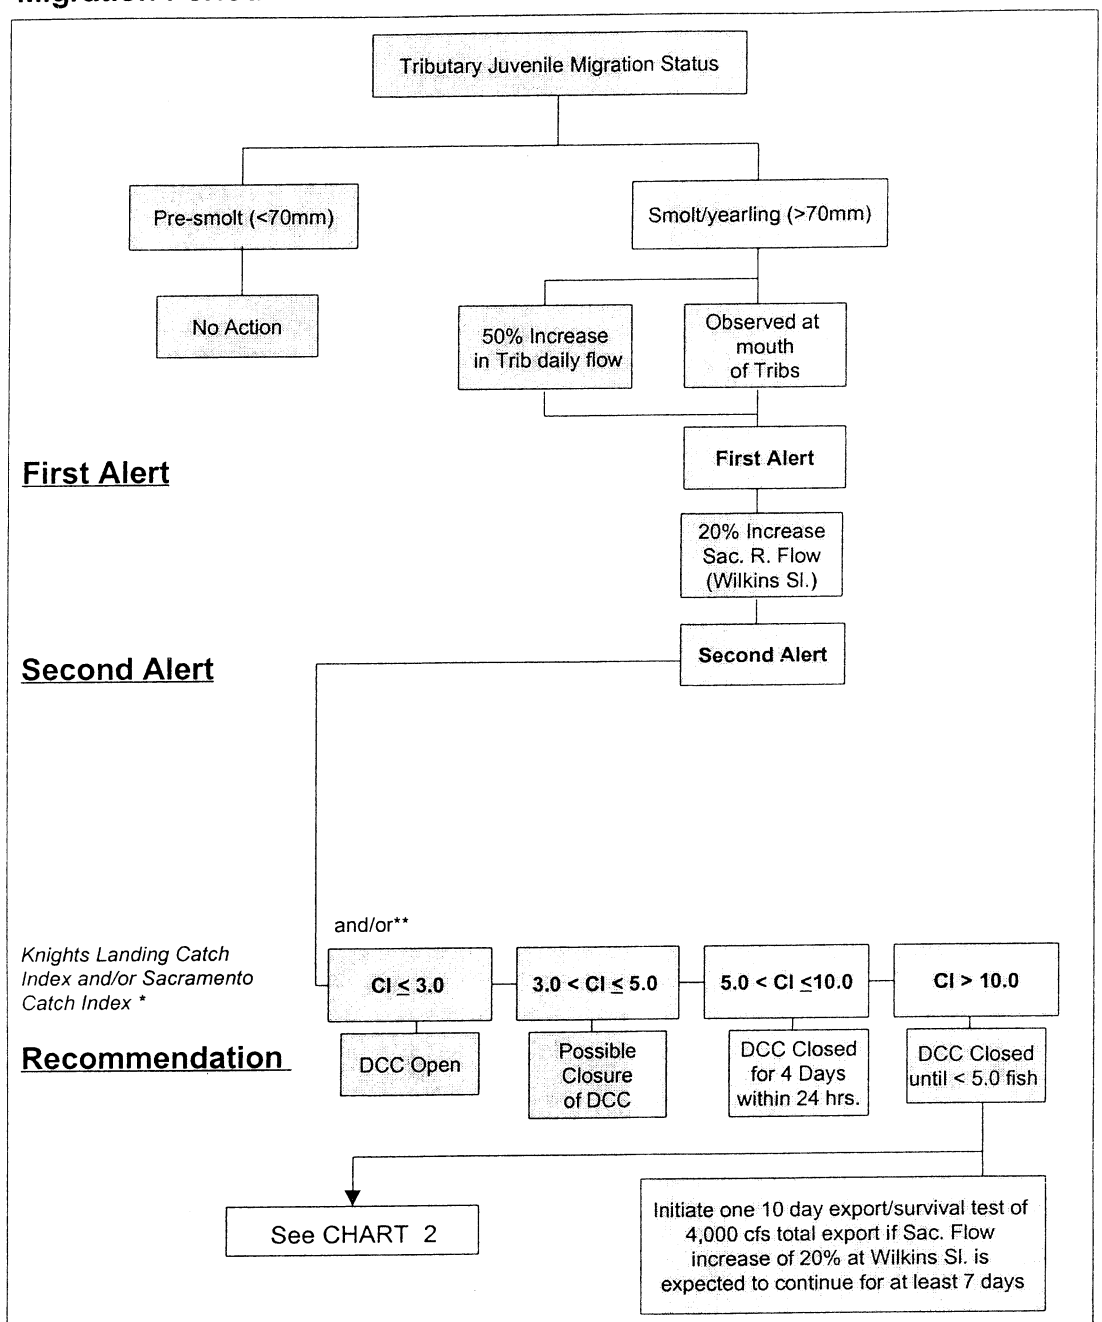
# Fall/Winter Juvenile Salmon Decision Process (Oct 1 - Jan 31)

November 14, 2000

## Migration Period



**Effort normalized to one 24 hour trap-day for the Knights Landing Catch Index and 10 trawls and 8 beach seine hauls per two-day sampling period in the Sacramento Catch Index.*

***Ideally, Knights Landing and Sacramento catches would confirm each other, however, protective criteria may be implemented based on either site.*
