
Priority List of Questions for Measurement Subcommittee to Address

Accuracy Standard

- Discuss pros and cons of three options (now included as Attachment 3 to the revised Discussion Paper).
- Are there other options to include that meet the requirements of the law?
- Details of how to define a standard
 - Does the definition of “accuracy standard” provide enough detail?
 - Is the formula for calculating accuracy the best one to use?
 - Should open channel delivery systems have a different accuracy standard than piped systems?
 - How should the “irrigation season” be defined for an agricultural water supplier?
- What specific exceptions, if any, might DWR need to consider in the regulation (e.g., deliveries to parcels below a certain threshold size are exempt)?

Device Accuracy Ratings

- What is a reasonable program for maintenance, checks, and calibration of measurement devices?
- How should DWR require reporting of measurement accuracy?
- What constitutes compliance?
