

**Worksheet 6:
Related Climate Change Projects and Programs**

Establishing consistency with climate change efforts in integrated flood management involves a comprehensive consideration of other climate change projects and programs and adaptation planning that will likely or certainly be in place during the near-term period of analysis for the CVFPP. These projects and programs are those that the CVFPP Plan Development Team should become familiar with and coordinate with regularly. This could include agency policy changes and other development that could benefit or affect the CVFPP development.

Please include the information on projects/programs in the columns below:

Name	Responsible Entity	Description	Reason for Project/Program Coordination
