

Worksheet 4: Drivers and Influencers

In future meetings the study team will be asking for your assistance to better define the future without project conditions, which will be used as a starting point for developing management actions and as a basis of comparison to measure the potential accomplishments of these management actions, individually or collectively. To assist the study team in preparing for these future sessions and developing the critical cornerstone of planning effort, we would like your thoughts on key drivers associated with the integrated flood management in your region. This information will help the study team determine the relationships and relative sensitivity of these drivers to the future without project conditions.

This diagram on the following page is an initial draft and very generic. As an individual, take a few minutes to review.

Worksheet 4: Drivers and Influencers

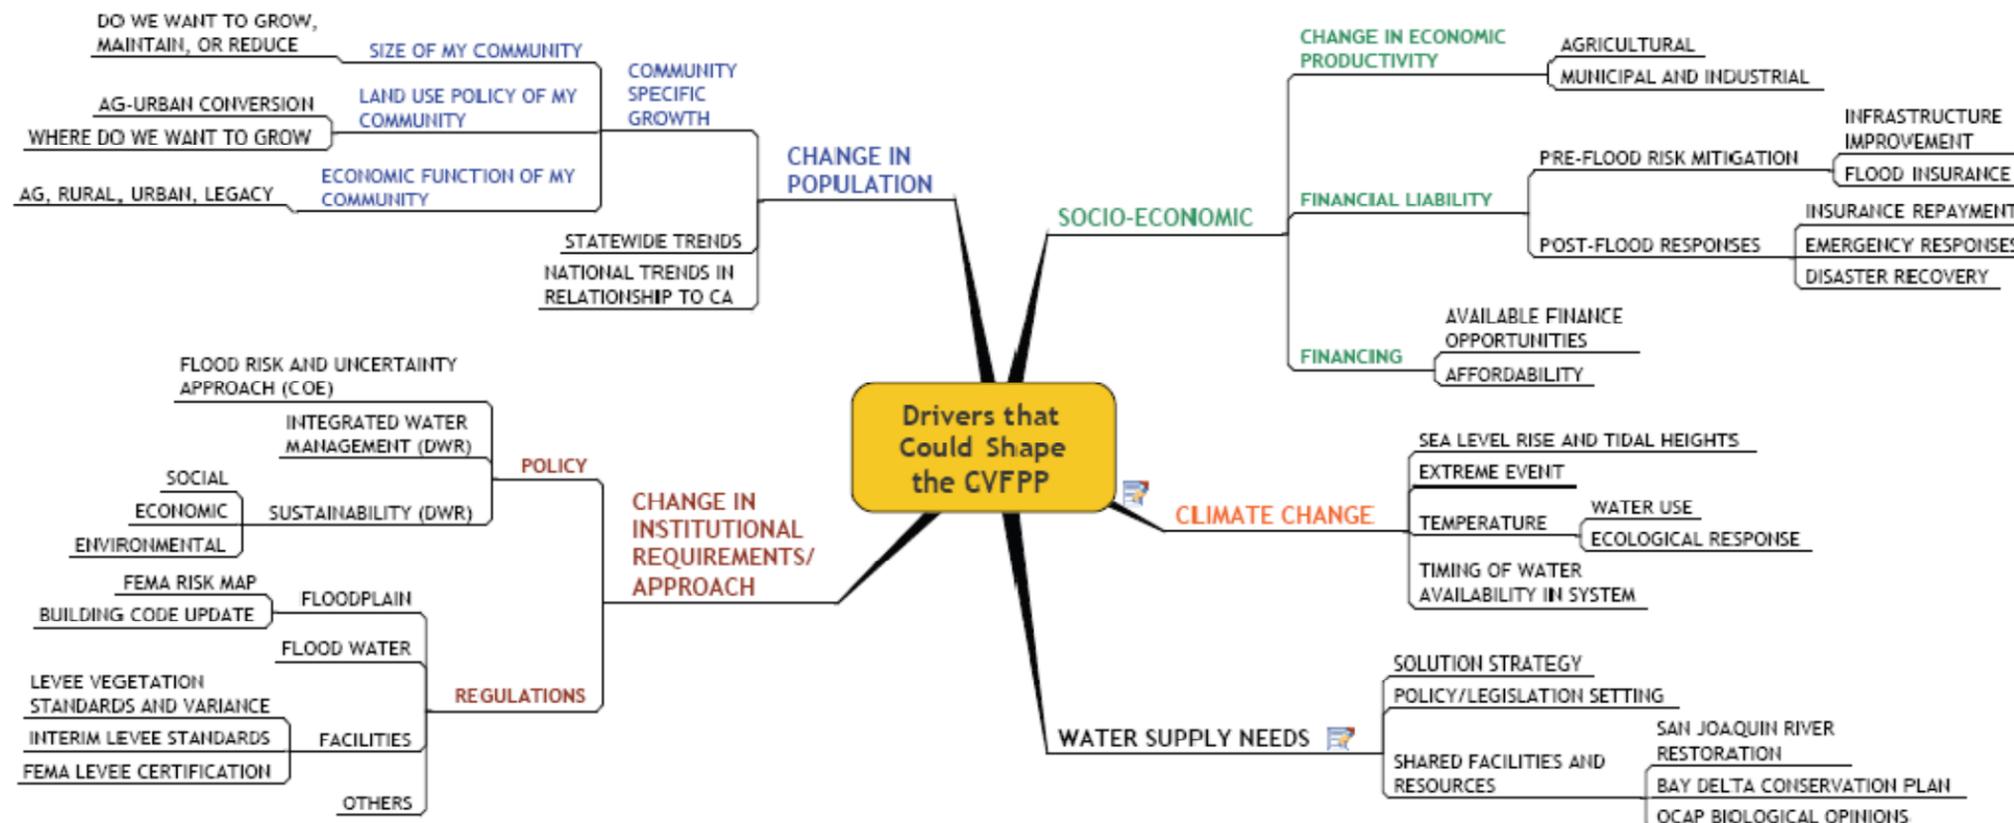

Question 1:

What would you add, subtract or change to make the drivers displayed in this graphic more relevant to your region?

The CVFPP is to provide a vision for a sustainable, integrated flood management in the Central Valley. The development is not in social vacuum and thus, major drivers are present to shape the CVFPP. The following provides some examples for discussion purposes.

- Where do you see the connection?
- How strong the connection is?
- What are our options from your community viewpoint, and from a societal viewpoint?

From these drivers and their associated correlation to CVFPP development, we can better manage our focus and options in developing the future without project condition.

Worksheet 4: Drivers and Influencers

Question 2

As an individual, thinking about the drivers already discussed and about flood management in your region/community. What are key drivers indicating a need for long-term changes in flood management strategies in your region?

As a group, please record key drivers you foresee for your region. As a group note what the trend of the driver is and timeframe. Then jot down why this particular driver will be important to your specific region/community.

DRIVER:	TREND –What direction is the driver going (more/less, faster/slower, etc.)? TIMEFRAME –What is the timeframe of this driver, both in when it occurs and the when the outcome of driver occurs?	NOTES ON HOW YOUR REGION/COMMUNITY BE AFFECTED BY THIS DRIVER
