

## Worksheet 6: Projects and Programs

Establishing a clear description of existing conditions must include a comprehensive consideration of projects and programs related to integrated flood management that will likely or certainly be in place during the near-term period of analysis for the CVFPP.

The purpose of this exercise is to better define the range of projects and programs that should be considered as part of the existing conditions through 2015. These projects and programs can be current or future efforts that are scheduled to take place at a local, regional or state level. They may be led by a public, private, or non-governmental organization. The following five criteria should be considered as a way to determine if a project or program is a reasonable part of the existing conditions (through 2015). Please include projects / programs that fulfill the criteria (listed below) and provide information on progress in the boxes:

Project Name	Authorized	Completed environmental compliance process	Funded	Permitted	Under Construction

## Worksheet 6: Projects and Programs

<b>Project Name</b>	<b>Authorized</b>	<b>Completed environmental compliance process</b>	<b>Funded</b>	<b>Permitted</b>	<b>Under Construction</b>

## Worksheet 6: Projects and Programs

<b>Project Name</b>	<b>Authorized</b>	<b>Completed environmental compliance process</b>	<b>Funded</b>	<b>Permitted</b>	<b>Under Construction</b>
