

WEF develops and posts online flood preparedness video

The Water Education Foundation (WEF) has developed and posted a 17-minute flood preparedness Web video, titled "[Getting Prepared: Preventing Flood Contamination in the Delta.](#)" which outlines steps to prevent potential contaminants from entering the water during a flood.

CFCC posts 2015 schedule of free Funding Fairs

The California Financing Coordinating Committee (CFCC) has posted the [2015 schedule of free statewide Funding Fairs](#). The Funding Fair closest to the Delta is in Sacramento, September 23. The Sacramento Funding Fair will be webcast. More information, including registration, is [here](#).

FloodSmart.gov has informative flood risk scenarios link

[FloodSmart.gov](#), the official Web site of the National Flood Insurance Program, has an informative link, [Flood Risk Scenarios](#).

IEP posts new delta smelt report, workshop information

The Interagency Ecological Program (IEP) has posted a report, titled [An Updated Conceptual Model of Delta Smelt Biology: Our Evolving Understanding of an Estuarine Fish](#). The report presents a new delta smelt conceptual model and uses it to understand why 2011 was a good year for delta smelt.

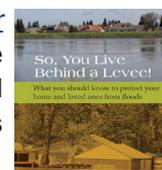

Also, the IEP will hold its 2015 Annual Workshop in Folsom, March 18-20. More information, including registration, is [here](#). Session topics include:

- Advancing Our Understanding of Delta Smelt.
- Emerging Technology to Inform Delta Fish Management.
- Suisun Marsh Stories.
- Lower Food Web Dynamics: From Flow to Fish.
- Functional Ecology of the North Delta.
- Methods and Evaluation of Entrainment and Loss.
- Advancing Life Cycle Models.
- Methods and Evaluation of Population Size Estimation.
- Advancing Research on Predation.
- Drought Assessment and Management of Salmonids.
- Understanding Drought Effects on Delta Smelt and Their Habitat.

So, You Live Behind a Levee! provides valuable information

[So, You Live Behind a Levee! What You Should Know to Protect Your Home and Loved Ones from Floods](#) is a 17-page booklet created by the American Society of Civil Engineers, in conjunction with several State and federal agencies and flood safety associations, which answers questions about living behind levees and the associated risks.
