

ISB to discuss and finalize review of Delta Plan tomorrow

The Delta Independent Science Board (ISB) will hold a teleconference tomorrow, Friday, June 8, to discuss and finalize its review of the [final staff draft](#) of the Delta Plan. A [draft memo](#) on that review is available on the board's website. Also on the agenda is a discussion on portions of the Bay Delta Conservation Plan. The teleconference line and the participant code can be found in the [meeting notice](#).

Final draft of Delta Plan on next week's agenda for DSC

The Delta Stewardship Council (DSC) is scheduled to take up the [final staff draft](#) of the Delta Plan during a two-day meeting next week in Sacramento. That portion of the [agenda](#) will include a stakeholder panel discussion. The council will also receive a report from the Delta Independent Science board. The meeting will be Thursday and Friday, June 14 and 15.

History and goals of river program illustrated in new map

The Water Education Foundation has published a new map of the San Joaquin River Restoration Program. It illustrates how the program works to restore both the river flows and the population of the Chinook salmon to the river. It also has some of the history of the program, its goals and progress being made toward those goals. The 24-inch by 36-inch maps are \$10 and can be ordered on the [foundation's website](#).

Looking at how the economy can prosper despite water problems

A report from the Public Policy Institute of California (PPIC) says the state's economy can prosper despite water problems created by climate change, but only if threats to the water system are addressed now. [Water and the California Economy](#) says one reason for a positive outlook is a declining reliance on water-intensive activities in the state. A [press release](#) and [short summary](#) of the report are available on the PPIC website.

Webcast will introduce utilities to handbook on sustainability plans

A [webcast](#) on Tuesday, June 12 will provide an overview of the U.S. Environmental Protection Agency handbook [Planning for Sustainability: A Handbook for Water and Wastewater Utilities](#). Registration for the webcast is required. The presentation will provide an introduction for water utilities about ways to incorporate sustainability considerations into their planning processes.
