Sir/ Miss, there are plans to build an canal trough the San Joaquin Delta. (In order to by pass the delta to convey the water to South Ca.

I, (we), think that this will be harmful, (kill), the environment of the delta.

Stockton has the longest inland seaport in the world. The "canal" would have to pass through, or under the river. I do not think that this is possible. I think that interrupting the flow of water would be like having a dam and the water would back up and flood.

What do you think? Is there any information on the subject? Thanks, Woody Alsbaugh
