

Question / Comment	Response
There were typos and spelling errors in the posted material.	The typos and spelling errors have been corrected.
Veale Tract project should have had a higher percentage tht the one indicated on the 'Recommended State Cost Share' column on the posted information.	Submitted project proposal information along with staff review of the given information, inclusive of staff following the Interim Guideline criteria, justify the Recommended State Cost Share ranking.
Expenditure on 8 Western Islands is too much.	Historically the Special Projects Program has served the 8 Western Islands. The Interim Guidelines process has opened up the Special Projects Program to all Islands of the Delta. For this fiscal year the expenditure on the 8 Western Islands was less than 50 percent.
Expenditures on subsidence reversal?	For several years, the Department has been studying subsidence reversal on Twithell Island.
Request the disclosure of detailed project evaluation.	Contact the Department of Water Resources Bay Delta Levees, Special Projects Program Manager, Mike Mirmazaheri . The website is located at http://www.water.ca.gov/floodmgmt/dsmo/bdlb/spp/
The Upper Jones project posted during the comment period was in question.	The Special Project submitted was not clear and Department of Water Resources staff inadvertently combined a series of projects during the review process. The projects were separated and staff re-evaluated each proposed project separately.
