

AGENDA
March 18, 2010 Meeting
Lower Feather River Corridor Management Plan Meeting
A collaborative strategy for optimizing management of the river corridor

The Lower Feather River Corridor Management Plan (CMP) is being developed to establish a vision for future management, restoration, and maintenance of flood control facilities, conveyance channels, and flood plain and related habitat on the Feather River from the Sutter Bypass to the Yuba River confluence (approx. 20 mi.). The CMP will implement the new collaborative approach for planning, designing and implementing projects within and adjacent to flood control features that DWR is responsible for maintaining and repairing.

Time	Topics	Lead
9:00 a	Introductions	Earl Nelson
9:15	Purpose and Need	Keith Swanson
9:30	Establish the scope (Region, temporally, key elements, etc.)	Tony Danna
10:00	Review the Team membership of CMP: Work Group and Policy Team	Tony Danna
