Subject: UKB IRWMA Advisory Committee and Board Meetings - Agenda Requests

Dave:

The City is acting as the primary lead agency on behalf of the Fresno Metropolitan Flood Control District in support of a project known as the "Fancher Creek Flood Control Improvement Project." The attachments provide the project description and pertinent exhibits. In order for this project to be eligible for consideration for the present Prop. 1E solicitation for projects, said project needs to be reviewed and recommended by the Advisory Committee to the Upper Kings Basin IRWM Authority Board. Additionally, the FMFCD staff, with the approval of its Board as of yesterday, wishes to become an interested party. Please find attached FMFCD's letter requesting to be an Interested Party. I am hereby requesting an emergency Advisory Committee meeting be convened this coming Tuesday (April 19) or Wednesday (April 20) to review and vote on the project prior to the Board meeting. Perhaps we can even handle this via email as done previously for the mini-Prop 50 solicitation.

Subsequent to the Advisory Committee review and recommendation on both the above items, the UKB IRWMA Board will need to approve FMFCD status as an Interested Party and the Proposed Project. Please add these items to the Board Agenda for the upcoming April 20, 2011, Board meeting.

Thank you for your assistance on this matter.

Brock
