

## 1.8 Surface Water Diverter Compliance

The BVWSD regularly submits Supplemental Statements of Water Diversion and Use to the State Water Resources Control Board (SWRCB), Division of Water Rights via electronic reporting. The most recent reports were submitted on June 19, 2014 for water diversions in 2013 (see **Appendix 1.8-A**). A list of the Surface Water Diversifiers, contact information, and compliance documentation is provided in **Table 1.8-1**.

**Table 1.8-1: Surface Water Diverter Compliance**

Project Proponent	Project	Contact Information	SWRCB Verification
BVWSD	Project 1 Brackish Groundwater Recovery Project	Buena Vista Water Storage District Maurice Etchechury, Engineer- Manager (661) 324-1101 <a href="mailto:maurice@bvh2o.com">maurice@bvh2o.com</a>	<b>Appendix 1.8-A</b> includes copies of the 2013 Reports submitted to the SWRCB.

The other project proponents are not considered Surface Water Diversifiers. They receive water diverted from various surface water sources by other agencies that would be subject to compliance. That diverted water is subsequently conveyed and sold to these implementing agencies by other agencies as detailed below, with diverting agency underlined. The applicable implementing agencies that receive this surface water supply are shown in parentheses.

- 1) State Water Project Water is diverted from the Delta by DWR and delivered by DWR in SWP facilities, principally the California Aqueduct. (KCWA ID4, AEWS)
- 2) Kern River Water is diverted from the Kern River by the City of Bakersfield or Kern Delta Water District. (KCWA ID4, AEWS)
- 3) Friant CVP Water including Section 215 is diverted from the San Joaquin River by the USBR at Millerton Lake and delivered via the USBR's Friant-Kern Canal and other facilities (i.e. to the Cross Valley Canal or Kern River). (KCWA ID4, AEWS)
- 4) Flood waters from other eastside Rivers (Kings, Kaweah, and Tule) that would otherwise flood Tulare Lake bed, are diverted from those rivers by Reclamation District 770 into the Friant-Kern Canal, and follow the same pathways described in item 3). (KCWA ID4, AEWS)
- 5) Westside CVP Section 215 and other floodwaters entering the Delta are diverted by the USBR at the Delta and delivered via the San Luis Canal\California Aqueduct. (KCWA ID4, AEWS)

<b>5. Water Diversion Measurement</b>		
a.	Measurement	Water directly diverted and/or diverted to storage was measured
b.	Types of measuring devices used	Acoustic Meter
c.	Additional technology used	Flow Totalizer Telemetry
	Description of additional technology used	Typical for acoustic meter. Telemetry to relay flows.
d.	Who installed your measuring device(s)	Representative using manufacturer's recommendations
e.	Make, model number, and last calibration date of your measuring device(s)	Panametric
f.	Why direct measurement using a device listed in Section 1 is "not locally cost effective"	
	Explanation of why use of devices and technologies listed in Section 1 are "not locally cost effective"	
	Method(s) used as an alternative to direct measurement	
g.	Explanation of method(s) used as an alternative to direct measurement	

<b>6. Purpose of Use</b>	
Irrigation	75000 Acres

<b>7. Changes in Method of Diversion</b>
No changes.

<b>8. Conservation of Water</b>		
	Are you now employing water conservation efforts?	Yes
a.	Describe any water conservation efforts you have initiated	Reduction in consumption use and diversions.
	Amount of water conserved	Acre-Feet
b.	I have data to support the above surface water use reductions du
