Proposal Name *	Upper Santa Clara River IRWM 2014 Drought Proposal			
Proposal Objective*	<p>The Upper Santa Clara River (USCR) Integrated Regional Water Management (IRWM) Region is applying for funding under the 2014 IRWM Implementation Drought Grant solicitation to implement three projects that will help alleviate drought impacts affecting water resource management in the USCR Region. Ongoing drought conditions are threatening the Region's ability to meet continued water demands and exacerbating water quality stresses on local surface water resources. The three projects will address water supply and quality to protect local water resources, increase access to needed water supplies and improve regional water supply reliability. Two projects will improve banking program conveyance, recharge and recovery capacities to achieve dry-year water supply protection and ensure access to previously banked supplies during future dry years. One project will upgrade disinfection facilities at the water reclamation plant in order to reduce increased drought-induced chloride concentrations and protect local surface water quality while still meeting required TMDLs. Project benefits will apply to the Santa Clarita Valley, the Upper Santa Clara Region, and the Lower Santa Clara Region.</p>
