<b>Proposal Name *</b>	Upper Sacramento, McCloud, and Lower Pit IRWMP 2014 Drought Grant Proposal			
<b>Proposal Objective*</b>	<p>The objective of this proposal is to obtain funding for the Upper Sacramento, McCloud, and Lower Pit Region allowing for implementation of projects needed to provide immediate regional drought preparedness, increase local water supply availability, assist water suppliers to implement conservation programs and measures that are not locally cost-effective, and reduce water quality and ecosystem conflicts created by the drought. The two projects included in this proposal will include implementing infrastructure renovations to a public water supply system in a disadvantaged community necessary to assure continued reliability of the minimum quality and quantity of drinking water required, as well as installing water meters which are critical to maintain water service and minimum system reliability. Both projects are integrated with components of California Trout projects including a climate change vulnerability assessment to allow for drought water supply forecasting and to provide drought preparedness through practical water conservation measures. All proposed projects will improve the accessibility of safe, clean, and affordable water, adequate for human consumption, cooking, and sanitary purposes for immediate and downstream users.</p>
