Proposal Name *	East Contra Costa County 2014 IRWM Drought Grant Proposal			
Proposal Objective*	<p>In response to the existing and anticipated drought related impacts within the East County region and in neighboring regions, members of the East County Water Management Association identified the following projects as being the best suited for providing immediate drought relief to the region: (1) BBID-CCWD Regional Intertie; (2) DWD Leak Detection and Repair, and (3) ISD Irrigation and Recycled Water Fill Station. Collectively, these projects will provide multiple benefits. Funding this proposal will result in immediate drought relief by (1) providing the infrastructure need to facilitate 10,000 AFY in water transfers; (2) saving 200 AFY of potable water supplies currently being lost via leaks in the distribution system; and (3) offsetting 20 AFY of potable water supplies by implementing a recycled water project to serve non-potable demands. Funding this proposal will also increase local water supply reliability through the implementation of system interties, leak detection and repair, and recycled water projects. Funding of this proposal will also ensure delivery of safe drinking water by eliminating avenues for pathogens to enter drinking water mains. Finally, funding this proposal will reduce conflicts and constraints associated with Delta water supplies and competing demands on Delta export facilities by implementing projects that collectively reduce demands on Delta supplies, thereby making additional water supplies available for ecosystem and water quality needs.</p>
