

## **1E. Project Consistency with an adopted IRWM Plan**

All three projects proposed in the Gateway Region Priority Drought Projects Initiative are included in the current IRWMP Project List. The Signal Hill Advance Groundwater Wellhead Treatment Facility is listed in the adopted 2013 Gateway IRWMP project list. The Cerritos/Forest Lawn Cypress Recycled Water System Extension and Miles Avenue Well Site Nitrate Blending Improvement have been vetted through the project list updating the process laid out in the 2013 Gateway IRWMP, which include project solicitation review, scoring, and ranking. After ranking by a Technical Review Team, the updated project list was reviewed and recommended by the Gateway Stakeholders group to the Gateway Water Management Authority for adoption. The GWMA adopted the updated project list in their regular monthly meeting on June 12, 2014.
