<b>Proposal Name *</b>	Kaweah River Basin 2014 Water Conservation and Water Quality Protection Projects Proposal			
<b>Proposal Objective*</b>	<p>The goals of the Kaweah River Basin IRWM Plan are to improve the drought preparedness, expand groundwater recharge capabilities, improve flood protection and sustain and improve groundwater quality for all water users in the Kaweah River IRWM area. These regional goals have been pursued through efforts to promote conjunctive use of surface and groundwater, reduce groundwater overdraft, develop projects that mitigate surface water supplies lost to environmental restoration or lawsuits, and to encourage the conservation of as much wet year water as possible through groundwater recharge. The projects in this Proposal are the best developed projects that pursue the objectives of the Kaweah River IRWM Plan and meet the specifications of this Drought Solicitation. The projects expand the regions ability to conserve the water supply (Visalia Water Conservation Programs Project) and develop feasible solutions to critical water quality issues in a disadvantaged community (Lindsay Well 15 Water Quality Protection Project).</p>
