

**CABY Integrated Regional Water Management Group
2014 IRWM Drought Grant Solicitation**

Attachment 1. Groundwater Management Compliance

Groundwater Management Plan Compliance

The CABY Proposition 84, 2014 IRWM Drought Grant Solicitation Proposal is comprised of projects that do not directly involve groundwater management or recharge.

Examples of projects included in this Proposal are projects that enhance infrastructure related to clean and reliable drinking water and relieving drought impacts. These, and the other projects included in this Grant Proposal have very positive impacts on surface water, but are not expected to impact groundwater.
