San Luis Water District submitted its AWMP to DWR on June 13, 2014, and its plan was verified to address the requirements of the Water Code in a response letter dated July 10, 2014. Central California Irrigation District's AWMP is presently being reviewed by the Bureau of Reclamation (Reclamation). Upon completion of that review, the AWMP will be submitted by DWR by Reclamation for their review; this is anticipated to occur in August of 2014. The other project proponents in this proposal are either not agricultural water purveyors or are not required to submit AWMP. Copies of verifying documentation for required AWMPs are included in Appendix 1.9.

Dear Ms. Hansen:

The Department of Water Resources (DWR) has received your Water Conservation Plan for the purpose of meeting the requirements of Water Code Section 10828. We find that your plan generally meets the requirements of the code section.

DWR's review of plans is limited to assessing whether suppliers have addressed the required legislative elements. In its review, DWR does not evaluate or analyze the supplier's plan data, projections, or water management strategies. This letter is simply meant to acknowledge that the supplier has addressed the Water Code requirements. The results of the review will also be provided to the DWR's Water Use and Efficiency grants program, the Financial Assistance Branch, and other State agencies, as applicable.

If you have any questions regarding the review of your plan, please feel free to contact Marty Berbach at (916) 651-9216 or martin.berbach@water.ca.gov.

Sincerely,
