

Attachment 1: Authorization and Eligibility Requirements for the Mokelumne /Amador / Calaveras Region

✓ **Groundwater Management Compliance**

The groundwater user that will receive funding from the proposed grant are:

- Amador Water Agency, Gene Mancebo, General Manager, 209-257-5245, gmancebo@amadorwater.org

None of the projects included in this proposal will affect groundwater; therefore, AWA has not submitted the GWMP Compliance form. Since the Upper Amador Canal Untreated Pipeline Project will replace a portion of the earthen, unlined Amador Canal (that typically loses water through seepage) with a pipeline, it would have the potential to affect groundwater, but this project does not overlie the Cosumnes Groundwater Subbasin, the only groundwater basin within Amador County (see Figure 1). The Ione Backwash Water Reuse Project overlies the subbasin but will not affect groundwater.
