### **Project Consistency with an adopted IRWM Plan**

All five (5) projects included in the Westside-Sacramento Drought Funding Application are consistent with IRWM Plan goals and objectives and have been vetted through the RWMG. The RWMG reviewed projects and opened the IRWM Plan for additional projects in April 2014. The Westside Coordinating Committee members reviewed the submitted projects on April 30, 2014 and reviewed scoring of the eight submitted project, for consistency with IRWM Plan and the drought solicitation request on May 8, 2014. Final selection of the five projects in this application was made by the Coordinating Committee on May 20, 2014. Below is a summary of the evaluations of the remaining five (5) projects and a statement regarding the inclusion of the YCFCWCD project in the existing IRWM Plan project list.

#### **Project: YCFCWCD Drought Preparedness Canal Modernization Project**

The Drought Preparedness Canal Modernization Project was previously included in the Westside Sacramento IRWM Plan. Project lists can be found in the Appendix D, Projects of the Westside Sacramento IRWM Plan.

#### **Project: Woodland Recycled Water Project**

The Woodland Recycled Water Project was not previously included in the Westside Sacramento IRWM Plan. The project was compared to the 24 IRWM Plan objectives in a similar fashion to that of the other projects. A standard project information form has also been filled out by the project proponent. Findings indicate that the project is consistent with the IRWM Plan and meets several Plan objectives. The project clearly satisfies 5 of the 24 objectives included in the Plan and emphasizes in water use efficiency, water supply reliability, and water quality.

#### **Project: Mt Hannah Pipeline Water Loss Minimization Project**

The Mt Hannah Pipeline Water Loss Minimization Project was not previously included in the Westside Sacramento IRWM Plan. The project was compared to the 24 IRWM Plan objectives in a similar fashion to that of the other projects. A standard project information form has also been filled out by the project proponent. Findings indicate that the project is consistent with the IRWM Plan and meets several Plan objectives. The project clearly satisfies 5 of the 24 objectives included in the Plan and emphasizes in water supply reliability and water use efficiency.

#### **Project: Spring Valley Pipeline Water Loss Minimization Project**

The Spring Valley Pipeline Water Loss Minimization Project was not previously included in the Westside Sacramento IRWM Plan. The project was compared to the 24 IRWM Plan objectives in a similar fashion to that of the other projects. A standard project information form has also been filled out by the project proponent. Findings indicate that the project is consistent with the IRWM Plan and meets several Plan objectives. The project clearly satisfies 3 of the 24 objectives included in the Plan and emphasizes in water use efficiency.

#### **Project: Paradise Valley Water System Intertie and Consolidation Project**

The Paradise Valley Water System Intertie and Consolidation Project was not previously included in the Westside Sacramento IRWM Plan. The project was compared to the 24 IRWM Plan objectives in a similar fashion to that of the other projects. A standard project information form has also been filled out by the project proponent. Findings indicate that the project is consistent with the IRWM Plan and meets several Plan objectives. The project clearly satisfies 4 of the 24 objectives included in the Plan and emphasizes in water supply reliability.
