

H. Groundwater Management Plan Compliance

Table 1-6 provides the list of project proponents, projects, and identifies whether the project proponents are groundwater users and if their project directly affects groundwater. **Table 1-7** lists agency contact information and the status of groundwater management plan (GWMP) compliance for projects that would directly affect groundwater levels or quality. Applicable GWMP self-certifications are included in the following pages.

Table 1-6. Project Proponents, Projects, and Groundwater Compliance Applicability

Project Sponsor	Project Number and Title	Groundwater Compliance Applicability and Justification
San Francisco Estuary Partnership (SFEP)	1 - Bay Area Advanced Quantitative Precipitation Information (AQPI) System	SFEP is not a groundwater user. The AQPI System Project would not directly affect groundwater levels or quality. However, the Project would benefit water supply and flood control efforts in the Bay Area region. These project benefits would indirectly benefit groundwater recharge efforts, but these benefits would be immeasurable.
Santa Clara Valley Water District (SCVWD)	2 - Anderson Dam Seismic Retrofit Project	SCVWD is a groundwater user and has met GWMP requirements. Self-certification of their compliance with California Water Code (CWC) GWMP requirements was previously submitted with the 2014 IRWM Drought Grant Application. The Anderson Dam is an element of SCVWD's groundwater management program. However, the project itself (Project 2) would not directly affect groundwater levels or quality. When complete and operational, the Project would indirectly contribute to SCVWD's groundwater recharge and management efforts.
Marin Municipal Water District (MMWD)	3 - Marin 2020 Turf Replacement Project	MMWD is not a groundwater user. Project 3 would not involve groundwater or directly affect groundwater levels or quality.
City of East Palo Alto	4 - East Palo Alto Groundwater Supply Project	The City of East Palo Alto is a groundwater user. Documentation of their GWMP compliance is provided below. Project 4 would directly affect groundwater levels and quality through installation of a new groundwater well and a groundwater treatment system on an existing well.
San Mateo County RCD	5 - Coastal San Mateo County Drought Relief Phase II	The San Mateo County RCD is not a groundwater user. Project 5 would not involve groundwater or directly affect groundwater levels or quality.
State Coastal Conservancy	6 - San Francisquito Creek Flood Protection and Ecosystem Restoration Project	The State Coastal Conservancy is not a groundwater user. Project 6 would not involve groundwater or directly affect groundwater levels or quality.
State Coastal Conservancy	7 - Mountain View Shoreline Portion of SBSPR Project	The State Coastal Conservancy is not a groundwater user. Project 7 would not involve groundwater or directly affect groundwater levels or quality.
State Coastal Conservancy	8 - Eden Landing Portion of SBSPR Project	The State Coastal Conservancy is not a groundwater user. Project 8 would not involve groundwater or directly affect groundwater levels or quality.
State Coastal Conservancy	9 – Novato Creek Phase 1 and/or Bel Marin Keys	The State Coastal Conservancy is not a groundwater user. Project 9 would not involve groundwater or directly affect groundwater levels or quality.

Table 1-7. Groundwater Management Plan Compliance

Project Sponsor	Agency Contact	Status of Groundwater Management Plan
City of East Palo Alto	Kamal Fallaha, Interim Public Works Director (650) 853-3189 kfallaha@CityofEPA.org	<p>The City of East Palo Alto overlies about 2.5 square miles of the San Mateo Plain Subbasin of the Santa Clara Valley Groundwater Basin, designated by DWR as Subbasin No. 2-9.03. The San Mateo Plain Subbasin underlying the City is classified as <u>very low priority</u> basin by CASGEM.</p> <p>The City is currently developing a GWMP to meet CWC requirements. The GWMP will be designed to ensure sustainable use and management of groundwater resources and to avoid negative impacts to the basin.</p> <p>The City's GWMP self-certification is provided on the following page.</p>

California Department of Water Resources
Integrated Regional Water Management Grant Programs

**CERTIFICATION FOR GROUNDWATER MANAGEMENT PLAN COMPLIANCE
FOR THE PROPOSITION 84, IMPLEMENTATION
GRANT PROGRAM**

Grant Program: Proposition 84, Implementation
IRWM Region: San Francisco Bay Area
Agency name: City of East Palo Alto
Project Title (as shown on application form): East Palo Alto Groundwater Supply Conjunctive Use Project

Please check one of the boxes below and sign and date this form.

- As the authorized representative for the agency, I certify under penalty of perjury under the laws of the State of California, that the agency has prepared and implemented a GWMP in compliance with CWC §10753.7.
- As the authorized representative for the agency, I certify under penalty of perjury under the laws of the State of California, that the agency participates or consents to be subjected to an existing GWMP, basin-wide management plan, or other IRWM program or plan that meets the requirements of CWC §10753.7(a).
- As the authorized representative for the agency, I certify under penalty of perjury under the laws of the State of California that the agency conforms to the requirements of an adjudication of water rights in the subject groundwater basin.
- As the authorized representative for the agency, I certify under penalty of perjury under the laws of the State of California, that my project is located in a low or very low priority groundwater basin (as defined by CASGEM) and the agency consents to be subjected to a GWMP that will meet the requirements of CWC §10753.7 and be completed within 1-year of the grant application submittal date.

I understand that the Department of Water Resources will rely on this signed certification in order to approve funding and that false and/or inaccurate representations in this Certification may result in loss of all funds awarded to the applicant for its project. Additionally, for the aforementioned reasons, the Department of Water Resources may withhold disbursement of project funds, and/or pursue any other applicable legal remedy.
