This application includes projects that involve groundwater management and groundwater recharge, and will have positive groundwater impacts. These projects and their implementing agencies are:

- The Mojave Region CII Turf Phase II Removal Program (on behalf of the Alliance for Water Awareness and Conservation (AWAC) - a coalition of 25 local water agencies and other regional organizations with the goal of reducing water consumption in the Mojave Region) will eliminate up to approximately 900,000 square feet of ornamental turf grass, reducing the amount of groundwater pumped for turf irrigation.
- The Hi-Desert Water District Sewer Collection System Phase 1A will stop leaking septic systems contaminating the groundwater by constructing sewer conveyance pipelines to collect the sewage, thus removing the source of contamination and improving the groundwater quality.

Self-certification of compliance with California Water Code §10753 regarding Groundwater Management Plans for these two agencies is provided below.

Two basins are adjudicated within the Mojave IRWM Region. The applicant, participating agencies and projects fully conform to the requirements of these adjudications. The applicant Mojave Water Agency serves as Watermaster for the Mojave Basin Area Judgment. The participating agency Hi-Desert Water District serves as Watermaster for the Warren Basin Judgment.
