

## Project Consistency with an adopted IRWM Plan

All projects have been fully incorporated into the ARB IRWMP following the procedures identified in the plan adopted by RWA on July 11, 2013. All projects have been reviewed and fully vetted with the RWMG and all ARB stakeholders. The process to vet projects occurs on an ongoing basis at a quarterly frequency. For each period that projects are added to the ARB IRWM website

(<http://irwm.rmcwater.com/rwa/login.php>), RWA releases an e-mail announcement summarizing the new projects to a list of more than 150 stakeholders that is maintained by RWA. Additionally, the information is posted on the ARB IRWM website, which sends out a weekly update to interested stakeholders that have signed up to receive announcements. Stakeholders are given a month to comment on any of these newly added projects as part of the vetting process.

The table below lists each project in the current application, the date the project was released for stakeholder vetting, and the date the project was added to the ARB IRWMP. Contact Rob Swartz, ARB IRWMP program manager, at 916-967-7692 or [rswartz@rwah2o.org](mailto:rswartz@rwah2o.org), if any additional clarifying information is required.

Project #	Project Proponent	Project Name	Date Vetted	Date Added to IRWMP
1	El Dorado Irrigation District	Outingdale Water Intake	4/4/14	5/5/14
2	Rio Linda/Elverta Community Water District	Well 10 Hexavalent Chromium Treatment	5/20/15	6/7/15
3	Sacramento County Water Agency	North Freeway Well Conversion	4/4/14	5/5/14
4	Regional Water Authority	Regional Water Efficiency Drought Measures	5/20/15	6/17/15
