

CASGEM Compliance

As shown in the table below, all projects in the application are either located in the North American Subbasin, the South American Subbasin, both of those subbasins, or located outside of a DWR-designated groundwater basin. Both the North American and South American subbasins are designated as high priority by DWR.

The North American Subbasin includes portions of Sutter County, Placer County and Sacramento County. Sutter County is not part of the ARB IRWMP, so it is beyond the scope or jurisdiction of this effort. However, it should be noted that the Sutter County portion of the subbasin does have South Sutter Water District as a designated CASGEM entity. In Placer County, the City of Roseville is the CASGEM entity. DWR has identified a small portion of western Placer County that overlies the North American Subbasin that is not within the City of Roseville's CASGEM monitoring plan. This is in an unorganized portion of Placer County, where none of the project proponents or participating agencies has jurisdictional authority to act as the monitoring entity. In the Sacramento County portion of the subbasin, the Sacramento Groundwater Authority (SGA) serves as the designated monitoring entity.

The South American Subbasin is located entirely within Sacramento County. The Sacramento Central Groundwater Authority (SCGA) is the designated monitoring entity for most of the subbasin. The County of Sacramento is the designated monitoring entity for the remainder of the subbasin.

There is one remaining DWR-designated groundwater subbasin in southwest Sacramento County that has a potential relationship to this application. The Solano Subbasin is medium priority basin as defined by DWR. None of the proposed projects in this application are within this subbasin. However, one project proponent, SCWA, does have service areas in the Sacramento County portion of the Solano Subbasin. The County of Sacramento is the designated monitoring entity in that part of the subbasin.

Project #	Project Proponent	Project Name	Groundwater Basin(s)	CASGEM Priority	CASGEM Monitoring Entity
1	El Dorado Irrigation District	Outingdale Water Intake	None	N/A	N/A
2	Rio Linda/Elverta Community Water District	Well 10 Hexavalent Chromium Treatment	North American	High	SGA
3	Sacramento County Water Agency	North Freeway Well Conversion	North American	High	SGA
4	Regional Water Authority	Regional Water Conservation Measures	North American/South American	High/High	SGA, City of Roseville, SCGA

RWA is serving as the project proponent on the Regional Water Conservation Measures Project. Participating agencies under the RWA project are listed in the table.

Participating Agency	Groundwater Basin(s)	CASGEM Priority	CASGEM Monitoring Entity
City of Folsom	North American/South American	High/High	SGA, SCGA, County of Sacramento
City of Lincoln	North American	High	City of Roseville
City of Sacramento	North American/South American	High/High	SGA, SCGA, County of Sacramento
Placer County Water Agency	North American	High	City of Roseville
Rio Linda/Elverta Community Water District	North American	High	SGA
Sacramento County Water Agency	North American/South American	High/High	SGA, SCGA, County of Sacramento
Sacramento Suburban Water District	North American	High	SGA
San Juan Water District	North American	High	SGA, City of Roseville

A figure showing the service area boundaries and project locations of all participants is shown on the following page. A GIS shape file of each project participant service area boundaries is uploaded to GRanTS (see Att1_2015IRWM_Eligible_10of10).
