

Attachment 1 – Authorization and Eligibility Requirements

Groundwater Management Compliance

CID developed and adopted their groundwater management plan in April 2009. This GWMP is a result of updating the District's 1995 GWMP to meet the requirements of CWC 10753. This project is consistent with the District's GWMP. A copy of the GWMP is available upon request if needed.

The project, implemented by Consolidated Irrigation District, includes groundwater recharge and will directly impact groundwater in the project area. The project is anticipated to have a positive impact on the groundwater level and groundwater quality conditions within the region. The local groundwater users include Consolidated Irrigation District, the City of Parlier, and several local farmers and rural residences. The District has provided the required self-certification compliance forms in conformance with CWC §10753 regarding Groundwater Management Plans, included as **Attachment 1h**.
