

Attachment 1 – Authorization and Eligibility Requirements

CASGEM Compliance

As a region, the Authority is currently working to be consistent with the recently legislated requirements of SB7x6 for groundwater measurement. Through the Authority, the region has prepared a Memorandum of Understanding between the various agencies with the region that have prepared a Groundwater Management Plan that will serve to address the new requirements. Kings River Conservation District staff submitted and was accepted as the local agency for submitting data to meet the requirements of SBx7-6 and California State Groundwater Elevation Monitoring (CASGEM) (see **Attachment 1i**). Local agencies perform their own quality assurance of the groundwater level data collection, and KRCD staff performs quality assurance on the data provided by the local entities by comparing to previous data collected and nearby data from other sources.
