

Proposal Full View

Applicant Information

Organization Name City of Imperial *
 Tax ID 0
 Proposal Name Imperial Integrated Regional Water Management Implementation Proposal *
 Proposal Objective The three projects listed in this proposal will diversify the regional water supply portfolio to ensure a long term, reliable and sustainable water supply supply. In addition, the three projects will improve water quality for the Imperial Region. The City of Holtville Wastewater Treatment Plan Improvement Project will advance the water quality goal listed in the IRWMP by supporting disadvantaged and other communities in meeting wastewater disposal and permit requirements as well as providing this support in a manner that will protect and enhance aquatic ecosystems and wildlife habitat. The Interconnection Project between the City of El Centro, City of Imperial and Heber Utility District will provide a reliable water source to the region by promoting an interconnected system that is consisted with regional community interests and will provide system redundancy, promote a community benefit and improve the overall water supply for the region. Finally, the Drainage Improvements in the Township of Seeley Project will promote flood protection by assessing regional flood control by implementing a project with strong stormwater management strategies. *

Project Information

Project Name Drainage Improvements in the Township of Seeley

Implementing Organization	City of Imperial
Secondary Implementing Organization	
Proposed Start Date	10/31/2013
Proposed End Date	11/15/2014
Project Scope	A minimum number of engineered drainage structures currently exist within the community of Seeley. The project will construct drain pipes under the roadways, which will convey rainwater away from the community. The improvements will prevent flooding of the streets, and will provide better and safer access for vehicles and pedestrians, as well as reduce the risk of disease from standing water.
Project Description	The City of Seeley is seeking to provide the City with much needed drainage infrastructure. This project will convey rainwater away from the community and in turn help to prevent the flooding of streets and provide a better and safer public access for vehicles and pedestrians in the community. In addition, as this project utilizes a storm water treatment system to cleanse water as it drains, it will reduce the risk of disease from standing water. The proposed project will provide additional drainage infrastructure to convey storm water away from Seeley to alleviate the severe flooding issues that plague the residents of this community. The project, which is considered a maintenance improvement, is located within the unincorporated Township of Seeley in the County of Imperial, approximately eight (8) miles west of the City of El Centro, California
	The storm water in Seeley currently ponds in the streets and at the side of the road.

Project Objective

Seeley residents are at health and safety risk because the standing water causes vector control issues. This project will practice integrated flood management by constructing drain pipes under roadways, and this project will expand environmental stewardship, in that it will drain the water away from the community and will go through a passive storm/nuisance water treatment system.

Project Benefits Information

Project Benefit Type	Benefit Type	Measurement	Description
Primary	Flood Protection	0	The project will construct drain pipes under roadways, which will convey storm water away from the community. The improvement will prevent further flooding of the streets, and will provide better and safer access for vehicles and pedestrians. The project will provide better emergency response time when the streets are flooded, as emergency vehicles will not be hindered by driving through deep water. The improvement will prevent further flooding of the streets, and will provide better and safer access for vehicles and pedestrians.

Project Objective

Budget

Other Contribution	100000
Local Contribution	0
Federal Contribution	0
Inkind Contribution	0
Amount Requested	1916795
Total Project Cost	2016795

US Congressional District	District 51 (CA)

Project Information

Project Name	Interconnection Project between City of El Cen
Implementing Organization	City of Imperial
Secondary Implementing Organization	
Proposed Start Date	10/1/2013
Proposed End Date	6/1/2014
Project Scope	This project proposes interconnecting potable water resources between The City of Imperial, The City of El Centro and the Heber Public Utility District.
Project Description	The City of El Centro would interconnect with the City of Imperial at two locations. The first interconnection is along La Brucherie Avenue between Cruickshank and Wall Rd for a distance of 2,100 linear feet. The second location is along 8th Street (Clark Rd) between Cruickshank and Aten Rd. for a distance of 2,850 lineal feet. Interconnection between the City of El Centro and Heber Utility District would also occur at two locations. The first south of Legacy Drive between 3rd Street and McCabe Cove for a distance of approximately 320 lineal feet. The second location is along Dogwood Avenue between Danenberg Drive and Black Hills Road for a distance of approximately 4,035 lineal feet. All connections would require water valves and bidirectional water meters to control and measure distribution between adjacent agencies. All work is proposed within existing right of way and easements. All interconnection pipelines will be installed within existing right-of-ways of the respective jurisdictions and the County of Imperial. Encroachment permits will be required to cross railroad rights-of-way and through Imperial Irrigation District

	easements.
Project Objective	The agencies seek to improve the reliability of the existing water distribution systems by taking advantage of their proximity to each other. The interconnection of the systems would mitigate system risks by improving reliability and promoting public safety. In addition, the project would promote mutual aid, provide system redundancy and improve drought response.

Project Benefits Information

Project Benefit Type	Benefit Type	Measurement	Description
Primary	Other	0	Water Supply: This project will integrate resource management strategies to diversify the regional water supply portfolio through the creation of an interconnected system that will provide an enhanced reliable source of water. The purpose of the project is to create redundancy and improve safety within the affected jurisdictions. Each agency has built redundancy within their systems; however there is no redundancy in water source. Should a water treatment plant in one agency malfunction, there is no way to import water from an adjacent water agency.

Project Information

Project Name	City of Holtville WasteWater Treatment Plant In
Implementing Organization	City of Imperial
Secondary Implementing Organization	City of Holtville
Proposed Start Date	10/1/2013
Proposed End Date	1/1/2015
Project Scope	The City of Holtville's project will make improvements to the Wastewater Treatment Plan to comply with the requirements established by the Regional Water Quality Control Board
Project Description	Dilapidating infrastructure associated with the City's Wastewater Treatment System is a primary economic concern given that the Holtville WWTP is out of compliance with its Regional Water Quality Control Board (RWQCB) NPDES permit and is under a Cease and Desist Board Order that would take an estimated \$8 million to address. The City's current WWTP is outdated and does not have the capability to treat wastewater to the effectiveness required by the regulations of the RWQCB. The new discharge requirement, specifically the effluent ammonia concentration limit, is the most significant driver of the plant upgrade project. The WWTP failed to meet the final effluent ammonia concentration limits established by the RWQCB and will be unable to comply with these requirements if this project cannot be completed.

Project Objective

The projects objective will make the mandated improvements in a timely and cost effective manner, and will do so with minimal adverse impacts to the environmental and the disadvantaged community which it serves. These objectives, which are designed to ensure compliance with the Cease and Desist Order and the NPDES permit issued by the RWQCB and those objectives established under the Integrated Regional Water Management Program.

Project Benefits Information

Project Benefit Type	Benefit Type	Measurement	Description
Primary	Water Quality Infrastructure- Improved wastewater treatment plant	0	The City's current WWTP is outdated and does not have the capability to treat wastewater to the effectiveness required by the regulations of the RWQCB. This project will improve water quality by making the mandated improvements in a timely and cost effective manner, and will do so with minimal adverse impacts to the environmental and the disadvantaged community which it serves.

Section : Applicant Information Question Tab

APPLICANT INFORMATION QUESTION TAB

Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal, including a listing of individual project titles. Please note which projects, if any, directly address a critical water supply or water quality issue for DACs or Native American Tribal communities.

The three projects listed in this proposal will diversify the regional water supply portfolio to ensure a long term, reliable and sustainable water supply supply. In addition, the projects will improve water quality for the Imperial Region. The City of Holtville Wastewater Treatment Plan Improvement Project will advance the water quality goal listed IRWMP by supporting disadvantaged and other communities in meeting wastewater disposal and permit requirements as well as providing this support in a manner that w protect and enhance aquatic ecosystems and wildlife habitat. The Interconnection Project between the City of El Centro, City of Imperial and Heber Utility District will provi reliable water source to the region by promoting an interconnected system that is consisted with regional community interests and will provide system redundancy, promot community benefit and improve the overall water supply for the region. Finally, the Drainage Improvements in the Township of Seeley Project will promote flood protection assessing regional flood control by implementing a project with strong stormwater management strategies. The objective of this Imperial Region IRWM Implementation Gr Proposal is to present three projects that further the regional goals and objectives listed in the Imperial IRWM Plan; provide multiple benefits through the integration and coordination of water management strategies; and assist in supporting and enhancing the Imperial Regions critical water supply and water quality needs. All three projects v serve and support disadvantaged communities in this region.

Q2. PROJECT DIRECTOR

Provide the name and details of the person responsible for executing the grant agreement for the applicant. Persons that are subcontractors to be paid by the grant cannot be listed as the Project Director.

City Manager Marlene Best 420 South Imperial Avenue Imperial, California 92251 Office: (760) 355-4373 Fax: (760) 355-4314 mbest@cityofimperial.org

Q3. PROJECT MANAGEMENT

Provide the name and contact information of the Project Manager from the applicant agency or organization that will be the day-to-day contact on this application.

Jorge Galvan, AICP Planning and Development Director CITY OF IMPERIAL Planning Department 420 South Imperial Avenue Imperial, CA 92251 phone: 760.355.3326
760.355.4718 email: jgalvan@cityofimperial.org

Q4. APPLICANT INFORMATION

Provide the agency name, address, city, state and zip code of the applicant submitting the application.

City of Imperial 420 South Imperial Avenue, Imperial CA 92251

Q5. ADDITIONAL INFORMATION

Provide the IRWM funding area(s) in which projects are locate.

Visit the following website to locate the IRWM funding area(s).

<http://www.water.ca.gov/irwm/grants/fundingarea.cfm>

Colorado River Basin

Q6. DAC WAIVER COST SHARE REQUEST:

Are you applying for a DAC cost share waiver? If yes, complete attachment 10.

Yes

Q7. RESPONSIBLE REGIONAL WATER QUALITY CONTROL BOARD(S) (RWQCB)

List the name of the Regional Water Quality Control Board (RWQCB) in which your proposal is located. For a region that extends beyond more than one RWQCB boundary, list the name of each Board.

Visit the following website to find the RWQCB for a particular location:

http://www.waterboards.ca.gov/waterboards_map.shtml

Colorado River RWQCB (7)

Q8. ELIGIBILITY

The Implementation Grant Program requires a minimum funding match of 25% of total project cost unless there is a DAC project included in the proposal. Requirements for DAC funding match reductions are included in Exhibit E of this PSP. Are your matching funds less than 25%? If so, please explain.

Yes, all three projects included in this proposal are DAC projects.

Q9. ELIGIBILITY

Does the application represent a single application from an IRWM Region approved in the RAP? To verify, see RAP website:

<http://www.water.ca.gov/irwm/grants/rap.cfm> If yes, include the name of the IRWM Region. If no, please explain.

No - The Imperial IRWM Region requested the top ranked projects in the region submit their applications to DWR

Q10. ELIGIBILITY

Please specify whether the applicant is a local public agency or non-profit organization as defined in Appendix B of the 2012 Guidelines.

Local Public Agency

Q11. ELIGIBILITY

List the urban water suppliers that will receive funding from the proposed grant. Please provide the agency name, a contact phone number and e-mail address. Those listed must submit self certification of compliance with CWC §525 et seq. and AB 1420, see Attachment 11. Answer "NA", if there are no urban water suppliers that will receive funding from the proposed grant.

City of Imperial

Q12. ELIGIBILITY

Have all of the urban water suppliers, listed in Q11 above, submitted complete Urban Water Management Plans (UWMPs), to DWR? Have those plans been verified as complete by DWR? If not, explain and provide the anticipated date for having a complete UWMP. Answer "NA" if no urban water supplier identified in Q11 above.

Yes

Q13. ELIGIBILITY

Have any urban water suppliers, listed in Q11, submitted AB 1420 compliance tables and supporting documentation to DWR for a different grant program on or after January 1, 2013? If so, please list the urban water supplier and the grant program. An urban water supplier must submit AB 1420 compliance documentation to DWR. If the urban water supplier has not submitted AB 1420 documentation, or that documentation was determined to be incomplete by DWR, the urban water supplier's projects will not be considered eligible for grant funding. Refer to Section IIIB of the 2012 Guidelines for additional information.

Answer "NA" if no urban water supplier identified in Q11 above.

No

Q14. ELIGIBILITY

Does the Proposal include any groundwater projects or other projects that directly affect groundwater levels or quality? If so, provide the name(s) of the project(s) and list the agency(ies) that will implement the project(s).

Answer "NA" if the Proposal does not include groundwater projects or other projects that directly affect groundwater levels or quality.

NA

Q15. ELIGIBILITY

For the agency(ies) listed in Q14, how has the agency complied with CWC §10753 regarding Groundwater Management Plans (GWMPs), as described in Section III.B of the 2012 Guidelines?

Answer "NA" if the Proposal does not include groundwater projects or other projects that directly affect groundwater levels or quality.

NA

Q16. ELIGIBILITY

Does the IRWM region receive water supplied from the Sacramento-San Joaquin Delta? Please answer yes or no. If no, please explain.

No, the Imperial Region receives water from the Colorado River.

Q17. ELIGIBILITY

Does the existing IRWM Plan help reduce dependence on the Sacramento-San Joaquin Delta for water supply? Please answer yes or no. If no, please explain. If yes, please complete attachment 13.

NA

Q18. ELIGIBILITY

If an update to the IRWM plan will take place in the near future, will the updated plan continue to reduce dependence on the Sacramento-San Joaquin Delta for water supply? Please answer yes or no. If no, please explain. If yes, please complete Attachment 13.

The IRWM plan was adopted in December 18, 2012. It is not expected that this plan will be updated in the near future.

Q19. ELIGIBILITY

List the agricultural water suppliers that will receive funding from the proposed grant. Please provide the agency/organization name, a contact phone number and e-mail address. If there are none, please indicate so.

NA

Q20. ELIGIBILITY

Have all of the agricultural water suppliers, listed in Q19 above, submitted complete Agricultural Water Management Plan to DWR? Have those plans been verified as complete by DWR? If the plan has not been submitted, please indicate the anticipated submittal date.

Answer "NA" if no agricultural water suppliers identified in Q19 above.

NA

Q21. ELIGIBILITY

List the surface water diverters that will receive funding from the proposed grant. Please provide the agency/organization name, a contact phone number and e-mail address. If there are none, please indicate so.

NA

Q22. ELIGIBILITY

Have all of the surface water diverters, listed in Q21 above, submitted to the State Water Resources Control Board surface water diversion reports in compliance with requirements outlined in Part 5.1 (commencing with §5100) of Division 2 of the CWC? If not, explain and provide the anticipated date for meeting the requirements.

Answer "NA" if no surface water diverters identified in Q21 above.

NA

Q23. ELIGIBILITY

List the groundwater users that will receive funding from the proposed grant. Please provide the agency/organization name, a contact phone number and e-mail address. If there are none, please indicate so.

None

Q24. ELIGIBILITY

Have all of the groundwater users, listed in Q23 above, met the requirements of DWR's CASGEM Program:

<http://www.water.ca.gov/groundwater/casgem/> ? If not, explain and provide the anticipated date for meeting the requirements.

Answer "NA" if no groundwater users identified in Q23 above.

NA

ATTACHMENT 11: GWMP, AB 1420, AND WATER METER COMPLIANCE INFORMATION

If your proposal does not include 1) a groundwater project or a project that directly affects groundwater levels or quality, or 2) an urban water supplier who would receive grant funding, you MUST still upload a document that indicates this attachment is not applicable to your proposal. If the upload field to this attachment is left blank, your proposal cannot be saved or completed.

Ensure file name is consistent with Section V of the P84 Round 2 Implementation PSP.

Upload GWMP, AB1420, and water meter compliance documentation here. This field is mandatory.

Last Uploaded Attachments: Att11_IG2_SelfCert_1of1.pdf

Upload additional GWMP, AB1420, and water meter compliance information documentation here, if necessary.

Upload additional GWMP, AB1420, and water meter compliance information documentation here, if necessary.

Upload additional GWMP, AB1420, and water meter compliance information documentation here, if necessary.

Upload additional GWMP, AB1420, and water meter compliance information documentation here, if necessary.

ATTACHMENT 12. CONSENT FORM

This attachment is required only if the proposal is utilizing an IRWM Plan that was adopted on or before September 30, 2008. The Consent Form contained in Exhibit F of the PSP must be signed and submitted in hard copy. Please refer to PSP for more information.

If this attachment does not apply to your proposal, you MUST still upload a document that indicates this attachment is not applicable. If the upload field to this attachment is left blank, your proposal cannot be saved or completed.

Ensure file name is consistent with Section V of the P84 Round 2 Implementation PSP.

Upload the signed consent form here. This field is mandatory.

Last Uploaded Attachments: Att12_IG2_Consent_1of1.pdf

ATTACHMENT 13: IRWM PLAN - REDUCED DELTA WATER DEPENDENCE

This attachment is required only if the IRWM region receives water supplied from the Sacramento-San Joaquin Delta. Attachment 13 must summarize the portions of the plan that address how implementation of the IRWM Plan will help reduce dependence on the Sacramento-San Joaquin Delta for water supply, and include relevant plan excerpts to support the summary. Please refer to PSP for detail information.

If this attachment does not apply to your proposal, you MUST still upload a document that indicates this attachment is not applicable. If the upload field to this attachment is left blank, your proposal cannot be saved or completed.

Ensure file name is consistent with Section V of the P84 Round 2 Implementation PSP.

Upload the summary of IRWM Plan here. This field is mandatory.
