Proposal Name **Madera Region IRWMP Update 2012** *

Proposal Objective
 The water users in the Madera Region have historically relied on groundwater to meet their domestic water demand and a large portion of their agricultural water demand. This continued reliance is straining groundwater supplies. Also, many areas of the valley floor of this Region are prone to flooding, requiring a comprehensive water management approach. This Integrated Regional Water Management Plan (IRWMP) will document the collective approach of the Region and its stakeholders to water management to deal with water supply, water quality, climate change, and flood management. The main objectives of the IRWMP are water resource management optimization, evaluating and increasing water supplies, water quality protection and improvement, climate change mitigation/adaptation and flood control planning. The main objective of this proposal is to update the current IRWMP from the Proposition 50 standards to the Proposition 84 standards. *

APPLICANT INFORMATION AND QUESTION'S TAB

Is this an application for a Regional Planning Grant or an Interregional Planning Grant?

- 1) Regional Planning Grant
- 2) Interregional Planning Grant

Q1. Proposal Description:

Provide a brief abstract of the Proposal. This abstract must provide an overview of the proposal including the main issues and priorities addressed in the proposal. Within the abstract, please state if the proposal is a regional (1 IRWM region) or interregional (more than 1 IRWM region) proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

This proposal is to update the current IRWMP from the Proposition 50 standards to the Proposition 84 standards. In addition to expanding the list of projects in the Region that are in the original IRWMP, there will be new Chapters on Climate Change, Disadvantaged Communities, Governance, and other topics. We will also review and update the current sections that were adopted as a plan in 2008. Because Madera County as a whole meets the definition of an economically disadvantaged community (EDC aka DAC) the local DACs will be prioritized. This plan will also address the whole region by working towards engaging in a collaborative process; obtaining resources to address water and natural resource issues; constructing and implementing plans and projects; and working towards resolving regional and local conflicts and issues in a consensus-based, voluntary and non-regulatory manner. This proposal is for a regional (1 IRWM region) grant.
