RE: Comments on the DRAFT 2016 Request for Proposals Disadvantaged Community Involvement

Dear Mr. Cross and Ms. Sparks,

The El Dorado County Water Agency (EDCWA) appreciates the opportunity to review and comment on the California Department of Water Resources' (DWR) Integrated Regional Water Management (IRWM) DRAFT 2016 Request for Proposals for Disadvantaged Community Involvement. As one of the founding members of the Cosumnes, American, Bear, Yuba (CABY) IRWM, EDCWA has successfully worked with our partners to develop, adopt, implement and revise the CABY IRWM Plan, and to also facilitate significant grant funding to implement priority projects contained within this plan.

EDCWA's comments are focused on the use of the Mountain Counties Overlay Area, which includes many IRWMs that form a very large and diverse geographic region. We recognize DWR's rationale and intention behind this overlay area, and the assumption of very broad similarities that exist within the rural regions along the western slopes of the Sierra Nevada. However, EDCWA has identified some significant and important distinctions when comparing the Northern area with the Southern area within of the Mountain Counties Overlay Area, which warrant your reconsideration of using this overlay tool as we undertake the Disadvantaged Community (DAC) Involvement process. EDCWA requests consideration to our comments in allocating funding to overlay areas and in the selection and administration of funding awards.

**1. The Mountain Counties Overlay Area should be divided into two smaller regions based on population and climatic differences with a common border at the southern extent of the CABY IRWM.**

- a. Group the Mountain Counties Overlay Area IRWMs into two smaller clusters:
  - i. From southern CABY border through the northern reaches of the Upper Feather River Watershed (which includes from south to north: CABY, American Rivers Basin, Yuba County, North Sacramento Valley, Upper Feather River Watershed); and
  - ii. The remaining IRWMs (which includes: the MAC, Tuolumne-Stanislaus, Yosemite-Mariposa, Madera, Southern Sierra).

With this division, DWR will have two clustered IRWM regions. This distinction recognizes the population density trends associated with the Northern cluster, which has a higher density (629,724 Total Population within the DAC places, DAC tracts, and DAC block groupings using current DWR mapping data). Whereas, the Southern cluster has a smaller Total DAC population (253,185), significantly less than the current data for the northern region of the Overlay Area. Water needs of the northern region are familiar and part of the ongoing CABY program. These needs are similar to the water needs of American Rivers Basin, Yuba County, North Sacramento Valley, and Upper Feather River Watershed.

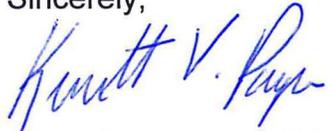

- b. The Northern cluster IRWMs within the Mountain Counties Overlay Area have a precipitation pattern and water management strategy based on historical hydrologic patterns. We are working individually, and collectively, to develop solutions to the effects of climate change in our region. The Southern part of this region has a more advanced situation with unique issues associated with climate change that suggest a redirection of priorities from floodwater storage to catastrophic fire risk reduction.
- c. The CABY IRWM covers the majority of the Northern Region and we currently have active and productive working relationships with a broad group of stakeholders including county agencies, tribes, and other critical inroads to accessing and working with Disadvantaged Communities and individuals. This relationship will provide a foundation in our successful effort to achieve the goals for DAC Community Involvement as stated in the DRAFT 2016 RFP. This foundation can be reasonably applied to the rest of the Northern IRWMs, however our similarities and familiarities are diluted when applied to the entire Mountain Counties Area.
- d. The CABY IRWM involves organizations that are already actively involved with one or more IRWMs and are capable of addressing the complexity of DAC assessments and addressing DAC inclusion in IRWMs or processes similar to IRWMs. This experience can be reasonably applied to the rest of the Northern IRWMs; however, our similarities and familiarities are diluted when applied to the entire Mountain Counties Area.

**2. Timing of IRWM Update to Meet Prop 1 Guidelines and Completion of the Disadvantaged Community Involvement Process needs to be clarified.**

As we review the DRAFT 2016 IRWM Grant Program Guidelines and the 2016 RFP for Disadvantaged Community Involvement Guidelines, the actual DAC involvement and participation in the CABY IRWM Plan update appears to be a step that occurs after the initial DAC Outreach and Involvement has been forged. At this time, CABY has worked, with success, to achieve initial DAC involvement, however additional effort is warranted. The timing of both issues needs to be addressed; undertaking both activities concurrently will likely result in inconsistencies between the CABY IRWM Update Process and the area-wide DAC Involvement process.

On behalf of EDCWA, we appreciate DWR's offer for review and comment to the RFP. If you have any questions regarding the suggestions and recommendations contain herein, please do not hesitate to contact me. We hope you will consider and incorporate this input into the Final RFP for DAC involvement.

Sincerely,

A handwritten signature in blue ink that reads "Kenneth V. Payne". The signature is written in a cursive, flowing style.

Kenneth V. Payne, P.E.  
Interim General Manager
