**Subject:** Comments on Additional Grant Awards for the Integrated Regional Water Management (IRWM) Grant Program

Dear Ms. Billington and Ms. Farahnak:

I would like to express my strong support that the State fund additional proposals from among Step 2 applicants in the implementation grants process.

Zone 7 of Alameda County Flood Control & Water Conservation District ("Zone 7 Water Agency", or "Zone 7") manages the water resources for the 425-square mile Upper Alameda Creek watershed in eastern Alameda County. Zone 7 is the area's water supply wholesaler, manages the Livermore-Amador Valley Main Groundwater Basin, and provides flood protection in eastern Alameda County.

Zone 7 collaborated with numerous water management agencies and entities around the nine-county Bay Area region and successfully completed the development of an Integrated Regional Water Management Plan (IRWMP). The Bay Area IRWMP is unprecedented in its comprehensive scope and coverage of all the water management functions undertaken by agencies around the region. Our collaborative process also brought together diverse agencies and stakeholders that historically function and pursue their individual interests independently, sometimes at odds with one another.

A number of IRWMP participants, including Zone 7, collaborated on the implementation grant proposal as a way to promote early implementation of multi-purpose projects that provide multiple benefits to constituencies in the Bay Area region. We heeded the State's call for consolidation and accommodated the halved grant amount in Step 1 by increasing our local match. However, local resources are already inadequate for completing all the necessary functional responsibilities, and it is increasingly difficult to justify additional expenditures on regional projects. A more substantial grant amount is needed to provide the needed incentive for project proponents to divert precious local resources to projects that may otherwise not be implemented.

Ms. Billington and Ms. Farahnak

Page 2 of 2

We are all faced with rapid escalation in construction costs and the diminishing value of the dollar because of delays in grant awards. It is imperative that the State release these public bond funds as soon as possible to put the public dollars to work. The 15 projects contained in the Bay Area proposal, if fully-funded, will produce water supply and water quality benefits valued at \$700 million.

As you well know, the Bay Area region is the economic engine of the state and country. Maintaining the economic vitality of the region through sound water management is one of the top priorities of the Bay Area IRWMP. I urge the State to consider the vital importance of the Bay Area region and reward the extraordinary efforts undertaken in the Bay Area by allocating a larger portion of the remaining Proposition 50 funds to the Bay Area.

Thank you for your consideration and the hard work that you and your staff invested in the IRWM program. Please do not hesitate to contact me or Vince Wong of my staff at (925) 454-5004 if you have any questions.

Very truly yours,

Dale Myers  
General Manager
