To whom it may concern,

I am a property owner in the "core" district which makes up the proposed Monte Rio Sewer project. I STRONGLY OPPOSE the project and any application for funding. I have seen no proof the my septic tank (or any septic tank, for that matter) is failing to the point of polluting the Russian River. In the 4+ years I have lived in my home, no one has come to my property to test my septic system. Why would we create this massive system that would basically be taking all sewage to a beautiful field down river. There is no "plant" to treat the sewage, just a large leech field RIGHT ON THE RIVER!

I feel that this project is too costly, enviromentaly damaging and untruthful to the property owners. Please do not let any funding be passed along for this ill fated disaster. As a young property owner with two small children, this project would put a large strain on my family's finances. If it were the best plan for an area strife with pollution (which we are not), I would consider the expense. But this plan is asking me to pay to ruin my childrens environment and I refuse to aid in that outcome. Thank you for your time, I hope my thoughts and concerns can be taking into the consideration of your decsion.

Thank you,
Amanda Atkinson
