Subject: Public Comment for Proposition 50

Tracie,

Good morning from Turlock. We would like to know if the State will be considering water meters for eligible funding through Prop 50? If AB 2572 should pass it would require water meters in unmetered towns such as Turlock to be installed over the next 20 years. Turlock has been considering water meters, but the funding has not been available. Prop 50 would be a great source for funding to help out local communities that are affected by this. Please consider water meters for eligibility for Prop 50 funding.

Thank you,
Carla McLaughlin
