Jim

Diane and I did some further edits this AM on the draft guidelines, attached.

One concern is really associated with outreach on this program. In re-reading the guidelines it became clear to us that an uninformed reader would not really understand that we are soliciting proposals for smaller coastal watersheds.

Another concern is that the previous draft was not clear as to what applied to coastal plans vs. IRMM plans, and that would scare off potential proposals from the smaller coastal watersheds. We also suggested a lower match for the coastal plans because of the resources available to those groups.

We believe the attached suggestions will help eliminate these problems if incorporated into the guidelines.

Dominic
