Subject: Prop. 50 IRWMP Grant Guideline Comment

Good Morning Tracie.

I attended the Prop 50 Workshop held in Ontario on 8/31/04. I believe at the workshop you mentioned that the definition of a disadvantaged community was still being thought out further to include just more than 80% of the average median household income (MHI) per the 2000 Federal Census.

The County of Ventura Water and Sanitation Department has conducted authorized surveys recently to get more accurate data of the MHI of communities in our County. It is proposed that additional language be added in further determining a disadvantaged community. The proposed language is "If the most current Federal income data does not accurately represent the community's MHI, the MHI can also be based on a local survey approved by the SWRCB and/or WRCB."

Thank You for giving us an opportunity to comment on the Grant Program Guidelines.
