**Subject:** Draft psp comment

Some DAC projects were prepared for the 2014 drought round and were not funded. One example of this is in the Kings IRWM where East Orosi and Sultana's water meter/conservation projects. The majority of the work and costs were generated this previous round and will likely be added to make changes for this year's app.

We are requesting that these costs generated for the previous round's application be considered eligible for reimbursement in addition to application prep costs generated in 2015.

Thank youfor your consideration.
