Proposal Name **Angiola Pilot Injection Well Groundwater Recharge Project** *

Proposal Objective **Provide equipment refit, install new pipeline delivery system, install new filtration system, deliver and filter surface water (or other test supply to be identified), maintain water quality standards for recharge, then effectively inject water into existing retrofitted well casings (owned by the Dsitrict but no longer suitable for groundwater extraction) through a gravity feed process and test and monitor results in an area not otherwise geologically capable of surface recharge to determine overall feasibility of methodology in an effort to further identify alternate recharge opportunities for improved groundwater management within the boundaries of Angiola Water District pursuant to the goals of the Tulare Lakebed Groundwater Management Plan.** *
