

## ATTACHMENT 7. SCHEDULE

### Carpinteria Valley Water District Carpinteria Groundwater Basin Sentry Well Project

The schedule for the Sentinel Well Project was established by the District and Pueblo and was based on the District’s knowledge and experience with the LGA process and permitting requirements, and Pueblo’s extensive experience with projects of this nature. The start date of April 2013 was adopted based on information provided in the 2012 LGA Proposal Solicitation Package. The project schedule by task is shown below:

#### Schedule Carpinteria Groundwater Basin Sentry Well Project

Task Description	NTP	2013										2014					
		Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June	
1	Project Coordination	→															
2	Environmental Permitting Assistance			→													
3	Development of Monitoring Well Specifications			◆	→												
4	Contracting and Permitting					→											
5	Drilling and Well Construction						◆	→									
6	Water Quality Testing									→							
7	Technical Advisory Committee Meetings																
8	Quarterly Reports			●			●				●						
9	Final Report										→			★			
Key:		→ Anticipated Task Duration; ◆ TAC Meeting; ● Quarterly Report; ★ Final Report.															

As shown, the estimate for the total project duration is eleven months from the start date. Even though the schedule incorporates realistic durations for the various project tasks, delays that may arise due to permitting or other obstacles can still be accommodated, and the total project performance time of two years can be met.
