

## Attachment 3: Status of GWMP

### County-Wide Groundwater Elevation Monitoring Program Local Groundwater Assistance Program Grant Application

#### Groundwater Management Plan

Mojave Water Agency (MWA) has an adopted Groundwater Management Plan (GWMP). The GWMP was adopted in 2005 as part of MWA's 2004 Regional Water Management Plan (RWMP). **Resolution 798-05** of the MWA Board of Directors adopting the GWMP is attached, as well as the GWMP checklist from the 2004 RWMP (Att3\_LGA12\_Mojave\_GWMP\_2of3.pdf).

#### San Bernardino County Groundwater Management Ordinance

The County of San Bernardino has a Groundwater Management Ordinance, adopted through **Ordinance 3872** in 2002, for the purpose of protecting groundwater resources in areas not already managed by other agencies within the County. The ordinance contains a mechanism to ensure "that extraction of groundwater does not exceed the safe yield of affected groundwater aquifers." Although this ordinance is not a GWMP, it does provide a level of groundwater management coverage for areas in the County which do not have GWMPs. Ordinance 3872, of the San Bernardino County Board of Supervisors, is attached (Att3\_LGA12\_Mojave\_GWMP\_3of3.pdf).
