

ATTACHMENT 3. Status of GWMP

For applicants without an adopted GWMP

Montara Water and Sanitary District (MWSD) seeks funding through the Local Groundwater Assistance (LGA) Proposition 84 funds to develop the Mid-Coastside Groundwater Management Plan (GWMP). The Mid-Coastside GWMP will be designed to promote sustainable resource use and effective long-term planning of groundwater throughout the San Mateo County Midcoast. Due to the complexity of the groundwater sub-basins throughout the Midcoast the primary focus of this initial GWMP is the Airport Terrace Sub-basin (“Airport Aquifer”). The tentative adoption date of the Mid-Coastside GWMP is January 2016 and is detailed in the Project Schedule (see Attachment 7: File 1 of 1). However, the District is prepared to complete and adopt the GWMP sooner, if funding is made available at an earlier date. The development of a Memorandum of Understanding (MOU) documenting the intent to develop and adopt the Mid-Coastside GWMP is outlined in the Work Plan (see Attachment 5: File 1 of 1). The Work plan also outlines the additional work required toward the adoption of the GWMP.
