

Attachment 8. Quality Assurance

Shasta County Water Agency staff assigned to this project will be Eric Wedemeyer, a registered Civil Engineer with 17 years of project management and 14 years of water background in California.

The Technical Advisory Committee will act as the quality control mechanism for development of the GWMP. They will review and ground-truth the draft materials put forward by the consultant at the ends of the major development phases of the work. Therefore, as the Technical Advisory Committee is selected, a breadth of background in geology, water, agriculture and silviculture will be sought.
