Lady and Gentlemen:

On December 22, 1961, a DECREE, a stipulated judgment, was entered for The Lytle Creek Water and Improvement Company, a corporation, vs. Fontana Ranchos Water Company, a corporation, et al., San Bernardino County Superior Court Case Number 81264. Several of the stipulating parties requested San Bernardino Valley Municipal Water District to monitor the compliance with the decree.

The decree specifies that each of three index wells in the Rialto Basin, shall be measured in March, April and May of each year. The enclosed table illustrates the

measurements of the Rialto Basin index wells for each of the months of March 2012, April 2012 and May 2012 for the October 1, 2011 through September 30, 2012 year as specified in the decree. These measurements are furnished by the respective owner of each of the index wells. The water level elevations above mean sea level, the apparent spring-high water level elevation for each well, and the average of the elevations of the spring-high water level elevations are also shown. The average of the elevations of the spring-high water level elevations determined in accordance with the decree is 950.3 feet above mean sea level for the October 1, 2011 through September 30, 2012 year.

Paragraph 7 of the decree sets forth specified limits on the amount of groundwater extractions allowed by the stipulating parties from the Rialto Basin based on the average of the elevations of the spring-high water level elevations. The average of the elevations of the spring-high water level elevations for the October 1, 2011 through September 30, 2012 year, 950.3 feet above mean sea level, is 19.4 below elevation 969.7 feet above mean sea level. Paragraph 7 of the decree specifies that for this condition; "...the amount of water which the stipulating parties shall be entitled to pump from the Basin during such year shall be reduced one per cent (1%) for each one (1) foot that the said average is below 969.7 feet above mean sea level..." Accordingly, the amounts of water to which the stipulating parties are respectively entitled to extract from the Basin as specified in Paragraph 5 of the decree, should be reduced by nineteen percent (19%) for the October 1, 2011 through September 30, 2012 year.

If you have any questions, please contact me at the San Bernardino Valley Municipal Water District office, telephone number: (909) 387-9250.

Sincerely,

A handwritten signature in blue ink, appearing to read "Samuel H. Fuller".

Samuel H. Fuller
