State Water Project Allocation Update

SACRAMENTO – The Department of Water Resources (DWR) is increasing its estimate of the amount of State Water Project water it will be able to deliver to contracting agencies this year.

The increase is based on recent precipitation and current water supply conditions.

The Allocation may be further increased if hydrologic conditions permit.

-0-

The Department of Water Resources operates and maintains the State Water Project, provides dam safety and flood control and inspection services, assists local water districts in water management and water conservation planning, and plans for future statewide water needs.
