Fifth Memo from Board of Consultants on Oroville Spillways Available

SACRAMENTO – The California Department of Water Resources (DWR) today posted the fifth memo prepared by the independent Board of Consultants (BOC) regarding the spillways at Lake Oroville. Following prior protocol set for the release of all BOC documents, the memo has been released with Critical Energy Infrastructure Information (CEII) redacted.

The BOC is tasked with providing feedback and oversight on DWR's design and construction plans for recovery of the Lake Oroville spillways. The BOC uses an iterative process to collect and provide this feedback, and this is the fifth memo prepared for DWR in that process.

The fifth memo from the Board of Consultants is posted here: <http://www.water.ca.gov/oroville-spillway/bocreports.cfm> Along with the redacted memo, DWR has also posted a summary of the memo.
