

Hexie Mountain Area Groundwater Basin

- Groundwater Basin Number: 7-53
- County: Riverside
- Surface Area: 11,200 acres (17.5 square miles)

Basin Boundaries and Hydrology

This basin is located in northeastern Riverside County and southeastern San Bernardino County. The basin is bounded by nonwater-bearing rocks on all sides and includes the Lost Horse and Ryan Mountains on the west and the Hexie Mountains on the east (Rogers 1965, 1967). Annual average precipitation ranges from about 8 to 10 inches.

Hydrogeologic Information

Water Bearing Formations

In this basin, groundwater is found in unconsolidated younger Quaternary alluvial deposits and the underlying unconsolidated to semi-consolidated older Tertiary to Quaternary alluvial deposits.

Restrictive Structures

An extension of an unnamed fault runs from the eastcentral portion of the basin to the eastern boundary (Rogers 1965); however, it is unknown whether or not it is a barrier to groundwater movement.

Recharge Areas

Recharge to the basin is derived chiefly from the infiltration of runoff through alluvial deposits at the base of the surrounding mountains.

Groundwater Level Trends

No information available.

Groundwater Storage

Groundwater Storage Capacity. Unknown.

Groundwater in Storage. Unknown.

Groundwater Budget (Type C)

No budget information available.

Groundwater Quality

Characterization. Unknown.

Impairments. Unknown.

Well Characteristics

Well yields (gal/min)		
Municipal/Irrigation	Range:	Average:
