

Comparison of Salt Loads in Four Grand Valley Tributaries

Early Period (1973-77 LC and BSW, 1973-80 Reed Wash, 1973-83 Salt Creek)

Salinity and Selenium Remediation in the Gunnison River Basin

Montrose Arroyo Demo project

- UVWUA replaced unlined ditches with 7.5 mi. of pipe
- Funded by Colorado River Basin Salinity Control Program & NIWQP
- Significant reductions in selenium (27%) and salts (11%)
- Cost-share funding is required for this program to compete in the Salinity Control process.
