

## Working Group Updates - Infrastructure

Advisory Committee  
September 20, 2005  
Holtville, California

### Review of Working Group Objectives

- ◆ **To develop all configurations with a common set of assumptions for evaluation**
- ◆ **To obtain input on a range of configurations and to discuss tradeoffs**
- ◆ **To understand operational and facility requirements of each configuration**
- ◆ **To understand sensitivity of each configuration to long term inflows and variability of other factors**
- ◆ **To develop criteria to accommodate construction phasing**

## Progress

- ◆ **For the Habitat Working Group, provided additional habitat-related information for various barrier configurations and inflows**
- ◆ **Preparing additional habitat-related information on balance of alternative concepts for Habitat Working Group**
  - **Connection to Gulf of California / Pacific Ocean**
  - **Multiple Concentric Rings**
  - **Evolving Sea**

## Next Steps

- ◆ **Work with Habitat Working Group to incorporate specific habitat features in each configuration**
- ◆ **Infrastructure Working Group will likely meet again after input by Habitat Working Group and refined criteria**
- ◆ **Prepare Infrastructure report describing engineering project features and constructability issues**
